

RIDI LINIA EVO®
WORKBOOK

RIDI

HISTORY OF THE RIDI LINIA CONTINUOUS-ROW LIGHTING SYSTEM

The predecessor

DL/DLF in IP20 and DLSF/DLS in IP50 continuous-row lighting system. A modular system consisting of the basic elements trunking (TRAS), quick-release catch, batten, reflectors and louvre/prismatic panels with a 12-page brochure.

1981

Introduction of the RIDI LINIA continuous-row lighting system

The previous SL system is replaced by the VL continuous-row lighting system.

Advantages:

- Design: pleasing, uniform shape
- Performance: high efficiency
- Technology: simplified and improved
- Product range: much more diverse
- System: only one trunking for both protection classes; still highly variable
- Less packaging

With its large-scale market launch, the new continuous-row lighting system resonates with customers.

1987

The beginning

The first in-house RIDI SL quick-mount continuous-row lighting system that is quick to install.

The success story of the RIDI continuous-row lighting system begins.

Brochure with photos/stills in a new layout. In 1989, 1990, 1991 and 1993, a series of new and expanded brochures appear, culminating in a catalogue.

1996

Relaunch of the RIDI LINIA continuous-row lighting system

RIDI LINIA continuous-row lighting system with through wiring profile – another major step towards the future. The relaunch features the fitting slogan “Clip in your Line”. All accessories can be attached anywhere on the product. A wide range of modules with spotlights makes new applications possible.

Introduction of LED technology to lighting solutions

New lengths, new technology and improved profiles and trunkings are now possible. RIDI LINIA FLAT and a range of modules with lens technology are popular.

2009

2013

RIDI LINIA EVO®

Launch of RIDI LINIA EVO

In March, the launch of the new continuous-row lighting system RIDI LINIA EVO begins. As part of the launch, production was completely reorganised with the opening of a state-of-the-art automated facility at the parent plant in Jungingen. The future has begun with easy networking, high flexibility, quick installation and optimum efficiency.

2024

SYSTEM OVERVIEW: RIDI LINIA EVO

The system overview for RIDI LINIA EVO makes it easy to navigate the product line. A complete list of all components such as luminaire inserts, modules and accessories as well as housing colours, lengths and light colours can be found at <https://www.ridi.de/en/luminaires-products/ridi-linia-evo>

RIDI LINIA EVO®

Pioneers in continuous-row lighting technology since 1987 – the concept has been continuously perfected ever since. The aim of the RIDI Group was to further improve the already successful continuous-row lighting system in terms of efficiency, mounting and functionality.

The launch of RIDI LINIA EVO in 2024 was a milestone in the history of continuous-row lighting systems. This revolutionary continuous-row lighting system takes the technology to a whole new level.

RIDI LINIA EVO redefines the standard for sustainable lighting solutions. But more than that, it inspires with its quick installation, easy retrofitting and sophisticated overall system.

RIDI LINIA EVO sets new standards for innovative lighting solutions that not only impress, but also shape the future of lighting.

EFFICIENT VARIABLE OPTIMAL – IN SHORT: EVO

The newly developed trunking offers maximum flexibility and perfect adjustments. It allows easy, collision-free mounting at joints, greatly simplifying the installation of luminaire inserts.

Overview of design variants

- 5-core: Ideal for cost-optimised projects
- 7-core: Perfect for entry into lighting management or emergency light integration (e.g. ED)
- 13-core: Ideal for projects with integrated emergency light function and sensors/light control
- 14-core (2x7-core): for complex installations with two DALI three-phase circuits

Gear trays

The gear trays have received a comprehensive efficiency update. Thanks to the perfect interplay between optics and LEDs, they achieve an impressive 206 lm/W.

A wide range of gear trays offer optimal glare reduction with a UGR value of ≤ 19 .

The overall package is suitable for a wide range of applications and sets new standards in efficiency.

RIDI LINIA EVO – quick and easy upgrades

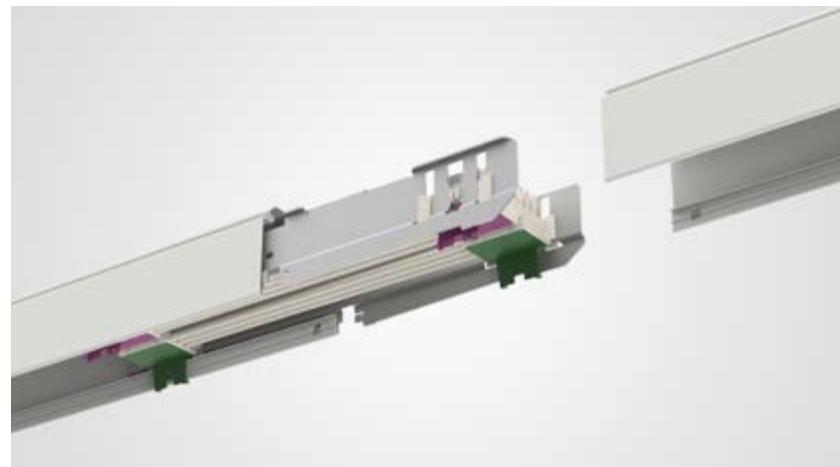

The RIDI upgrade kit allows you to flexibly adapt your trunking installation (e.g. for 5-core and 7-core systems) without having to replace the whole system. Our VL2MF modules, such as emergency light, and emergency signs, can be retrofitted. They are equipped with individual controls and are easy to integrate by means of cable installation. If you have any questions, we are happy to help!

DUO CONNECT trunking connector

The new DUO CONNECT trunking connector combines two functions by replacing the mechanical and electrical connector with one component. This practical solution greatly simplifies installation, reduces preparation time and makes for hassle-free mounting. An advanced approach that combines efficiency and ease of use in a single product.

- With IP54 protection, DUO CONNECT with pre-attached seal
- Electrical accessories can be found at page 92

DUO CONNECT electromechanical connector, 13-core, IP20

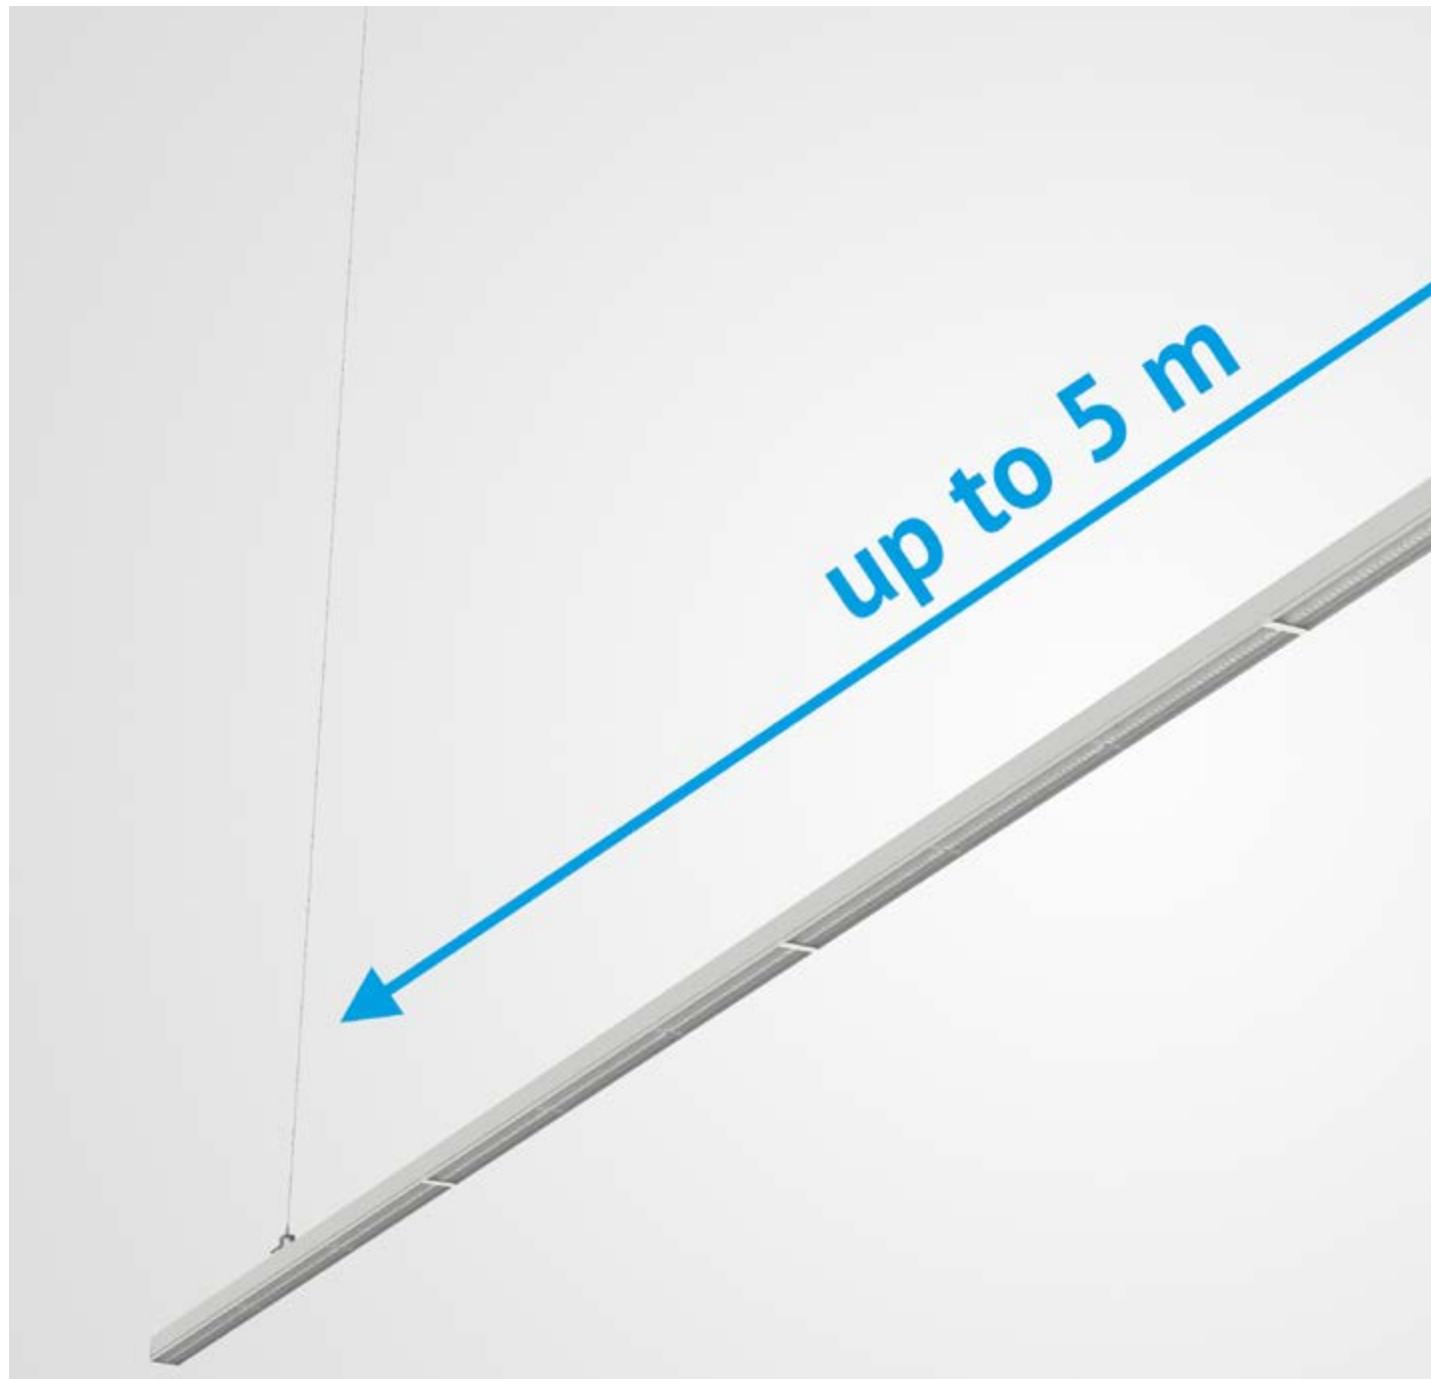

DUO CONNECT electromechanical connector, 13-core, IP54

EFFICIENCY OPTIONS FOR YOUR PROJECT

RIDI LINIA EVO offers advantages in multiple areas:

- Suspension distance of up to 5 metres: reduction of suspension points
- Use of 2-metre gear trays: reduction of commissioning of DALI addresses
- Reduced hassle thanks to optimised packaging

The suspension distances can be adjusted flexibly to perfectly match each lighting module. For exact specifications, just check the installation instructions!

FACTS AND FIGURES

Example: 90-metre-long continuous-row lighting system

Gear trays

- RIDI LINIA 1.5 metres: 60 gear trays
- RIDI LINIA EVO 2.0 metres: 45 gear trays with up to 25% reduction

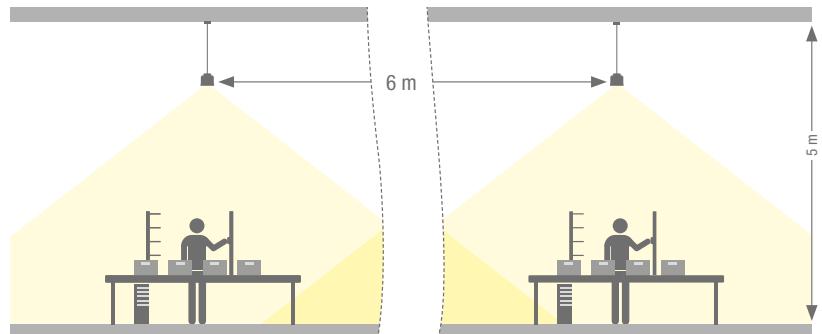

Hanger

- Old/previous RIDI LINIA: 37 hangers
- RIDI LINIA EVO: 20 hangers with up to 35% reduction
 - Up to 15% less investment
 - Up to 23% quicker new installation for luminaire inserts

DESIGN EXAMPLES: INDUSTRY

ASSEMBLY HALL UGR ≤ 25

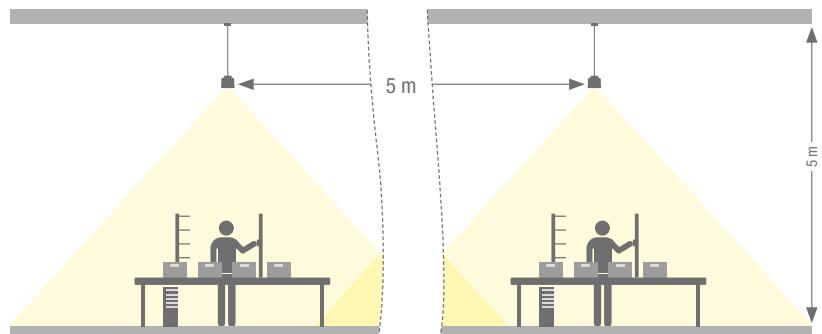

Design example		Optics BE
System spacing	6 m (≤ 7 m)	
Installation height	4 m (3–6 m)	
Luminous flux (L 1.5 m)	max. 8,000 lm	
Ceiling height	5.0 m	
Work plane	0.85 m	

extremely wide beam

ASSEMBLY HALL UGR ≤ 22

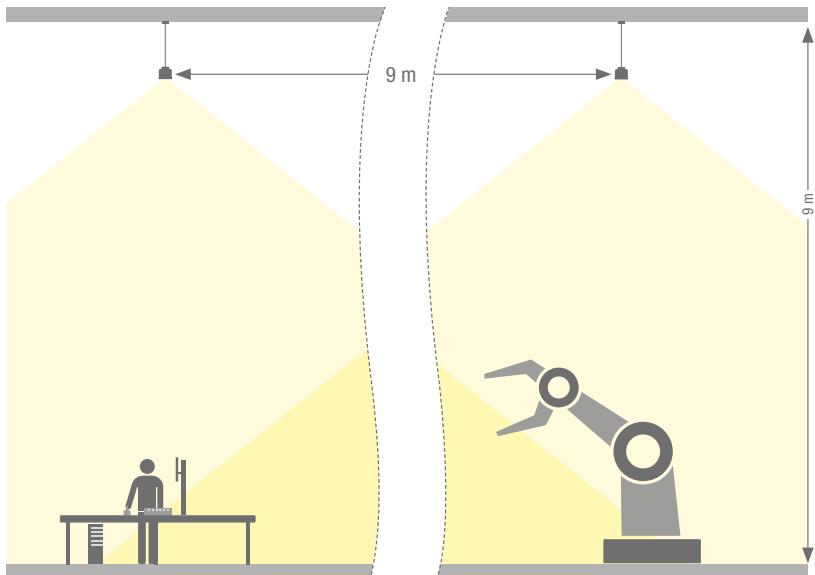

Design example		Optics B
System spacing	5 m (≤ 8 m)	
Installation height	4 m (3.5–6 m)	
Luminous flux (L 1.5 m)	max. 8,000 lm	
Ceiling height	5.0 m	
Work plane	0.85 m	

wide beam

PRODUCTION HALL UGR ≤ 25

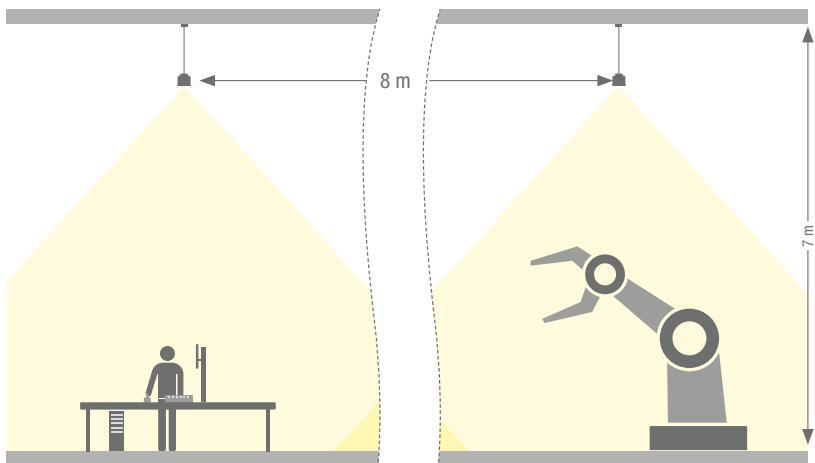

Design example	Optics BE
System spacing	9 m (≤ 9 m)
Installation height	8 m (6–8 m)
Luminous flux (L 1.5 m)	max. 8,000 lm
Ceiling height	9.0 m
Work plane	0.85 m

extremely wide beam

PRODUCTION HALL UGR ≤ 22

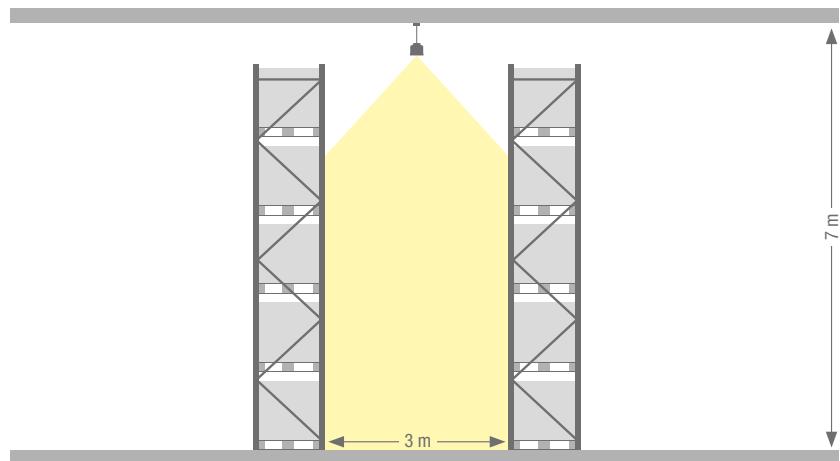

Design example	Optics B
System spacing	8 m (≤ 10 m)
Installation height	6 m (6–10 m)
Luminous flux (L 1.5 m)	max. 8,000 lm
Ceiling height	7.0 m
Work plane	0.85 m

wide beam

WAREHOUSE UGR ≤ 25

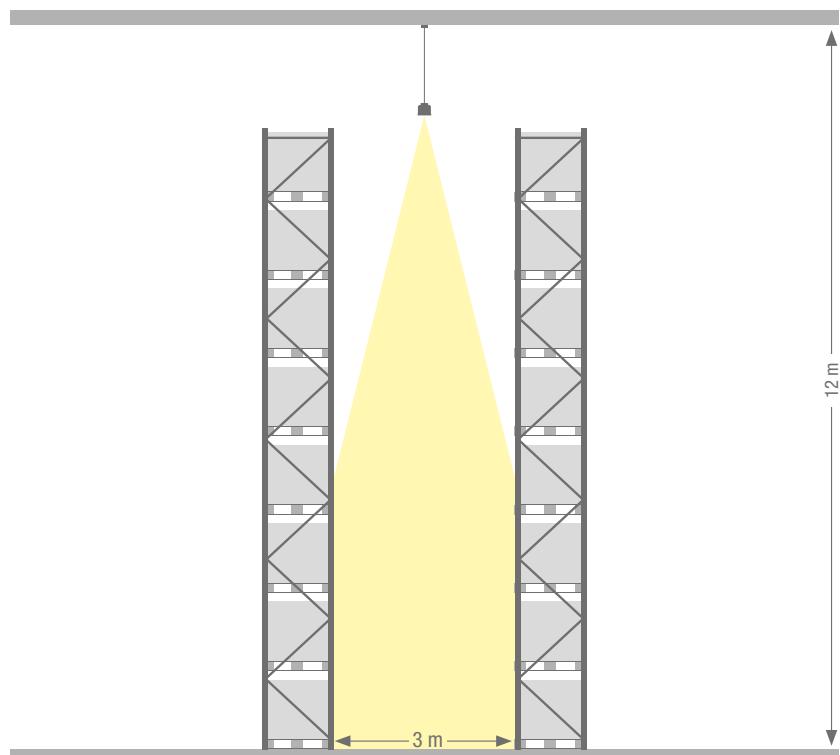

Design example		Optics B
Aisle width	3 m (2–3 m)	
Installation height	6.5 m (2.5–8 m)	
Luminous flux (L 1.5 m)	7,500–15,000 lm	
Ceiling height	7.0 m	
Work plane	0.0 m	

wide beam

HIGH-BAY WAREHOUSE UGR ≤ 25

Design example		Optics TB
Aisle width	3 m (2–3 m)	
Installation height	10.5 m (6.5–8 m)	
Luminous flux (L 1.5 m)	7,500–15,000 lm	
Ceiling height	12.0 m	
Work plane	0.0 m	

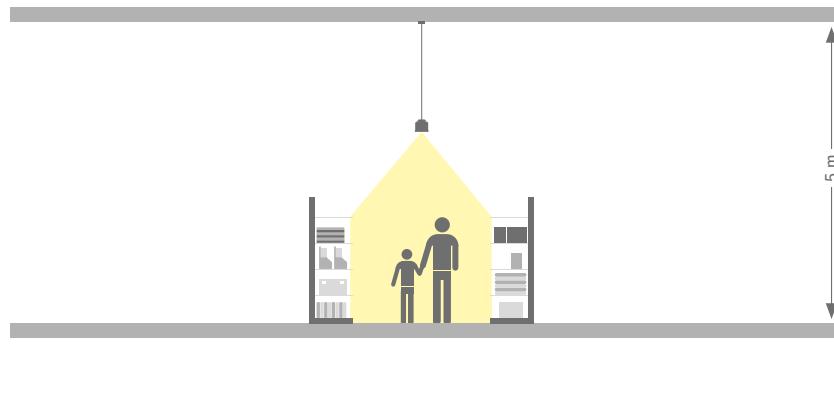

deep-wide beam

DESIGN EXAMPLES: RETAIL

RETAIL AISLE UGR ≤ 22

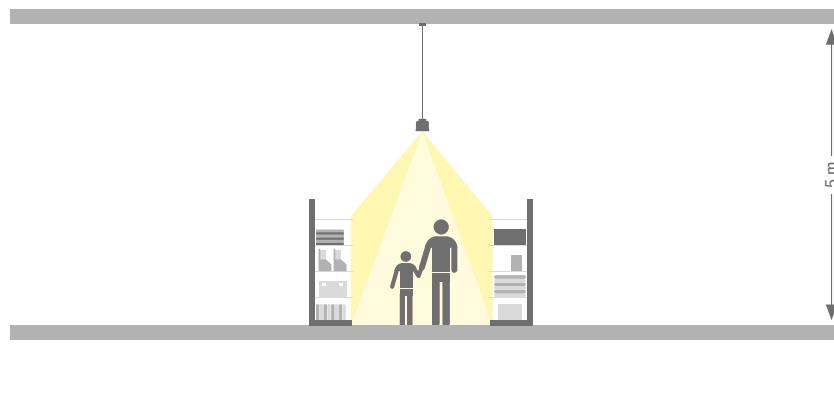

Design example	Optics B
Aisle width	2.2 m
Installation height	3.2 m
Luminous flux (L 1.5 m)	4,900 lm
Ceiling height	5.0 m
Work plane	0.0 m

wide beam

RETAIL AISLE + SPOTLIGHT UGR ≤ 22

Design example	Optics B + CIRQUA-L Flood
Aisle width	2.2 m
Installation height	3.2 m (6.5–8 m)
Luminous flux (L 1.5 m)	4,900 + 2,500 lm
Ceiling height	5.0 m
Work plane	0.0 m

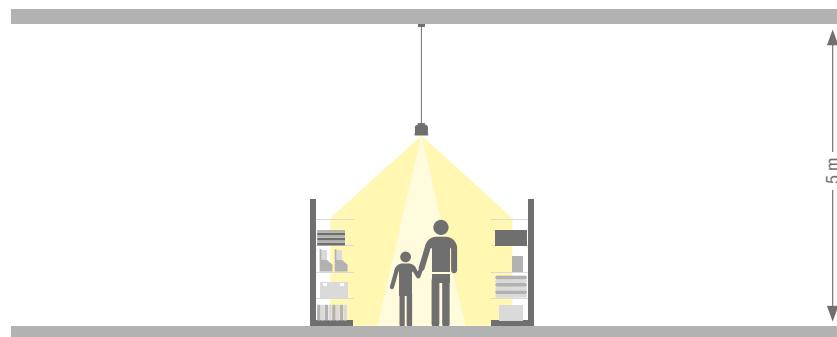

wide beam

medium beam

RETAIL AISLE UGR ≤ 22

Design example	Optics R
Aisle width	2.2 m
Installation height	3.2 m
Luminous flux (L 1.5 m)	8,200 lm
Ceiling height	5.0 m
Work plane	0.0 m + shelf front

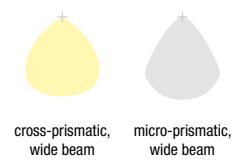

double asymmetric
beam

RETAIL CHECKOUT AREA UGR ≤ 19

Design example	Optics BQP
Installation height	3.2 m
Luminous flux (L 1.5 m)	3,500 lm
Ceiling height	5.0 m
Work plane	1.0 m

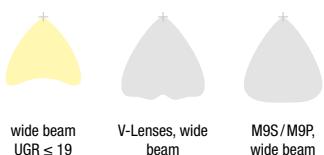

DESIGN EXAMPLES: OFFICE AND EDUCATION

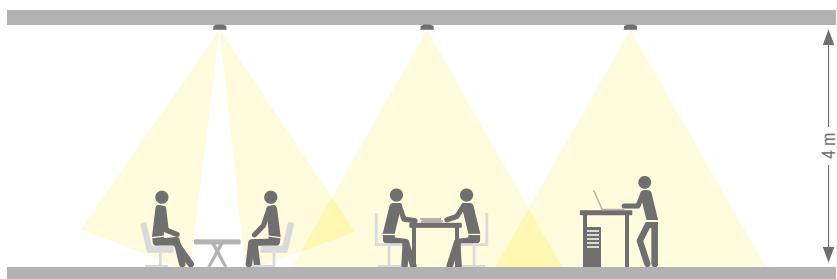

OFFICE UGR ≤ 19

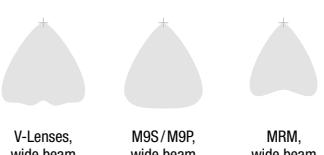

Design example		Optics BU
Installation height (B – V-Lenses)	2.8 m (2.5–5 m)	
Recommended installation height (M9S / M9P)	>3.5 m	
Luminous flux (L 1.5 m)	5,000–7,000 lm	
Ceiling height	2.5 m	
Work plane	0.75 m	

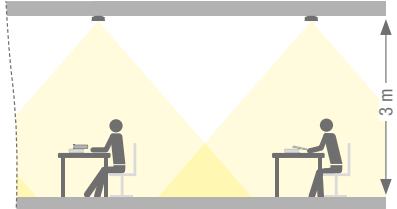

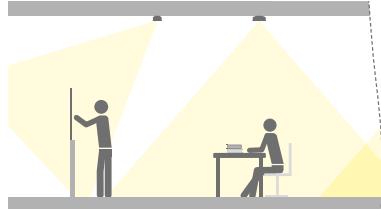

OPEN OFFICE SPACE (NEW WORK) UGR ≤ 19

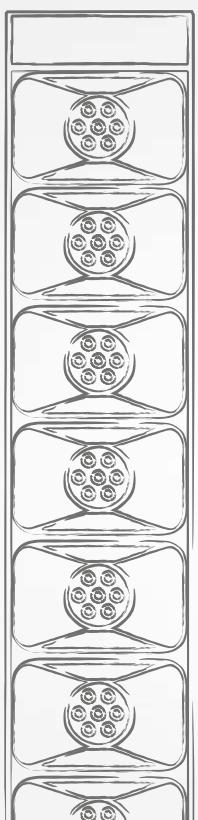

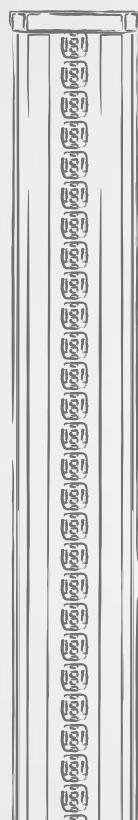

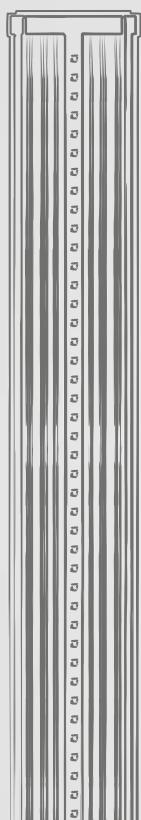

Design example		Optics BU + CIRQUA-L Flood
Installation height (B – V-Lenses)	4 m (2.5–5 m)	
Recommended installation height (M9S / M9P – MRM)	>3.5 m	
Luminous flux (L 1.5 m)	4,000–7,000 lm	
Ceiling height	4.0 m	
Work plane	0.75 m	

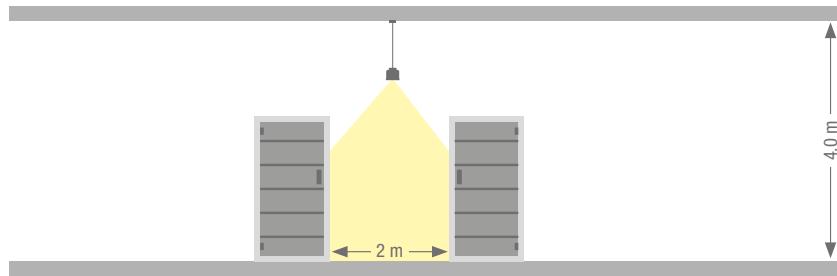

CLASSROOM UGR ≤ 19

Design example	Optics BU + A
Installation height (V-Lenses)	3 m
Luminous flux (L 1.5 m)	5,500–7,000 lm
Ceiling height	3.0 m
Work plane	0.75 m

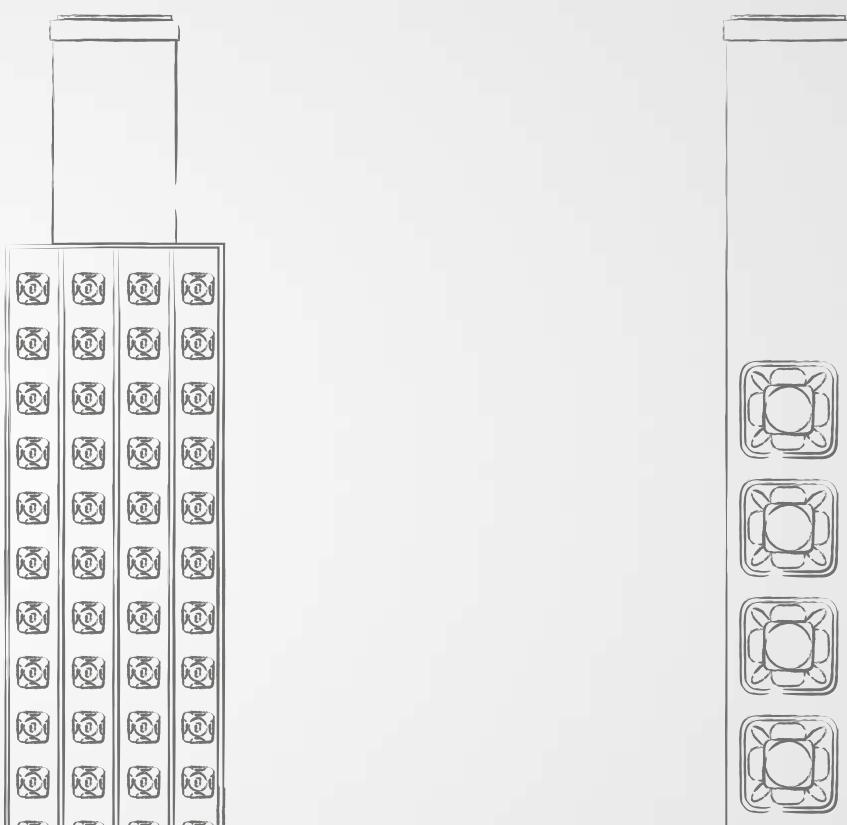

DATA CENTRE

Design example	Optics BU
Aisle width	2 m (1.20–3 m)
Installation height	3 m (2.5–3.5 m)
Luminous flux (L 1.5 m)	7,500–15,000 lm
Ceiling height	4.0 m
Work plane	0.0 m

wide beam
UGR ≤ 19

RIDI LINIA EVO CONTINUOUS-ROW LIGHTING SYSTEM CONFIGURATOR

The new **RIDI LINIA EVO continuous-row lighting system configurator** is available at the link below to help you design your continuous-row lighting system.

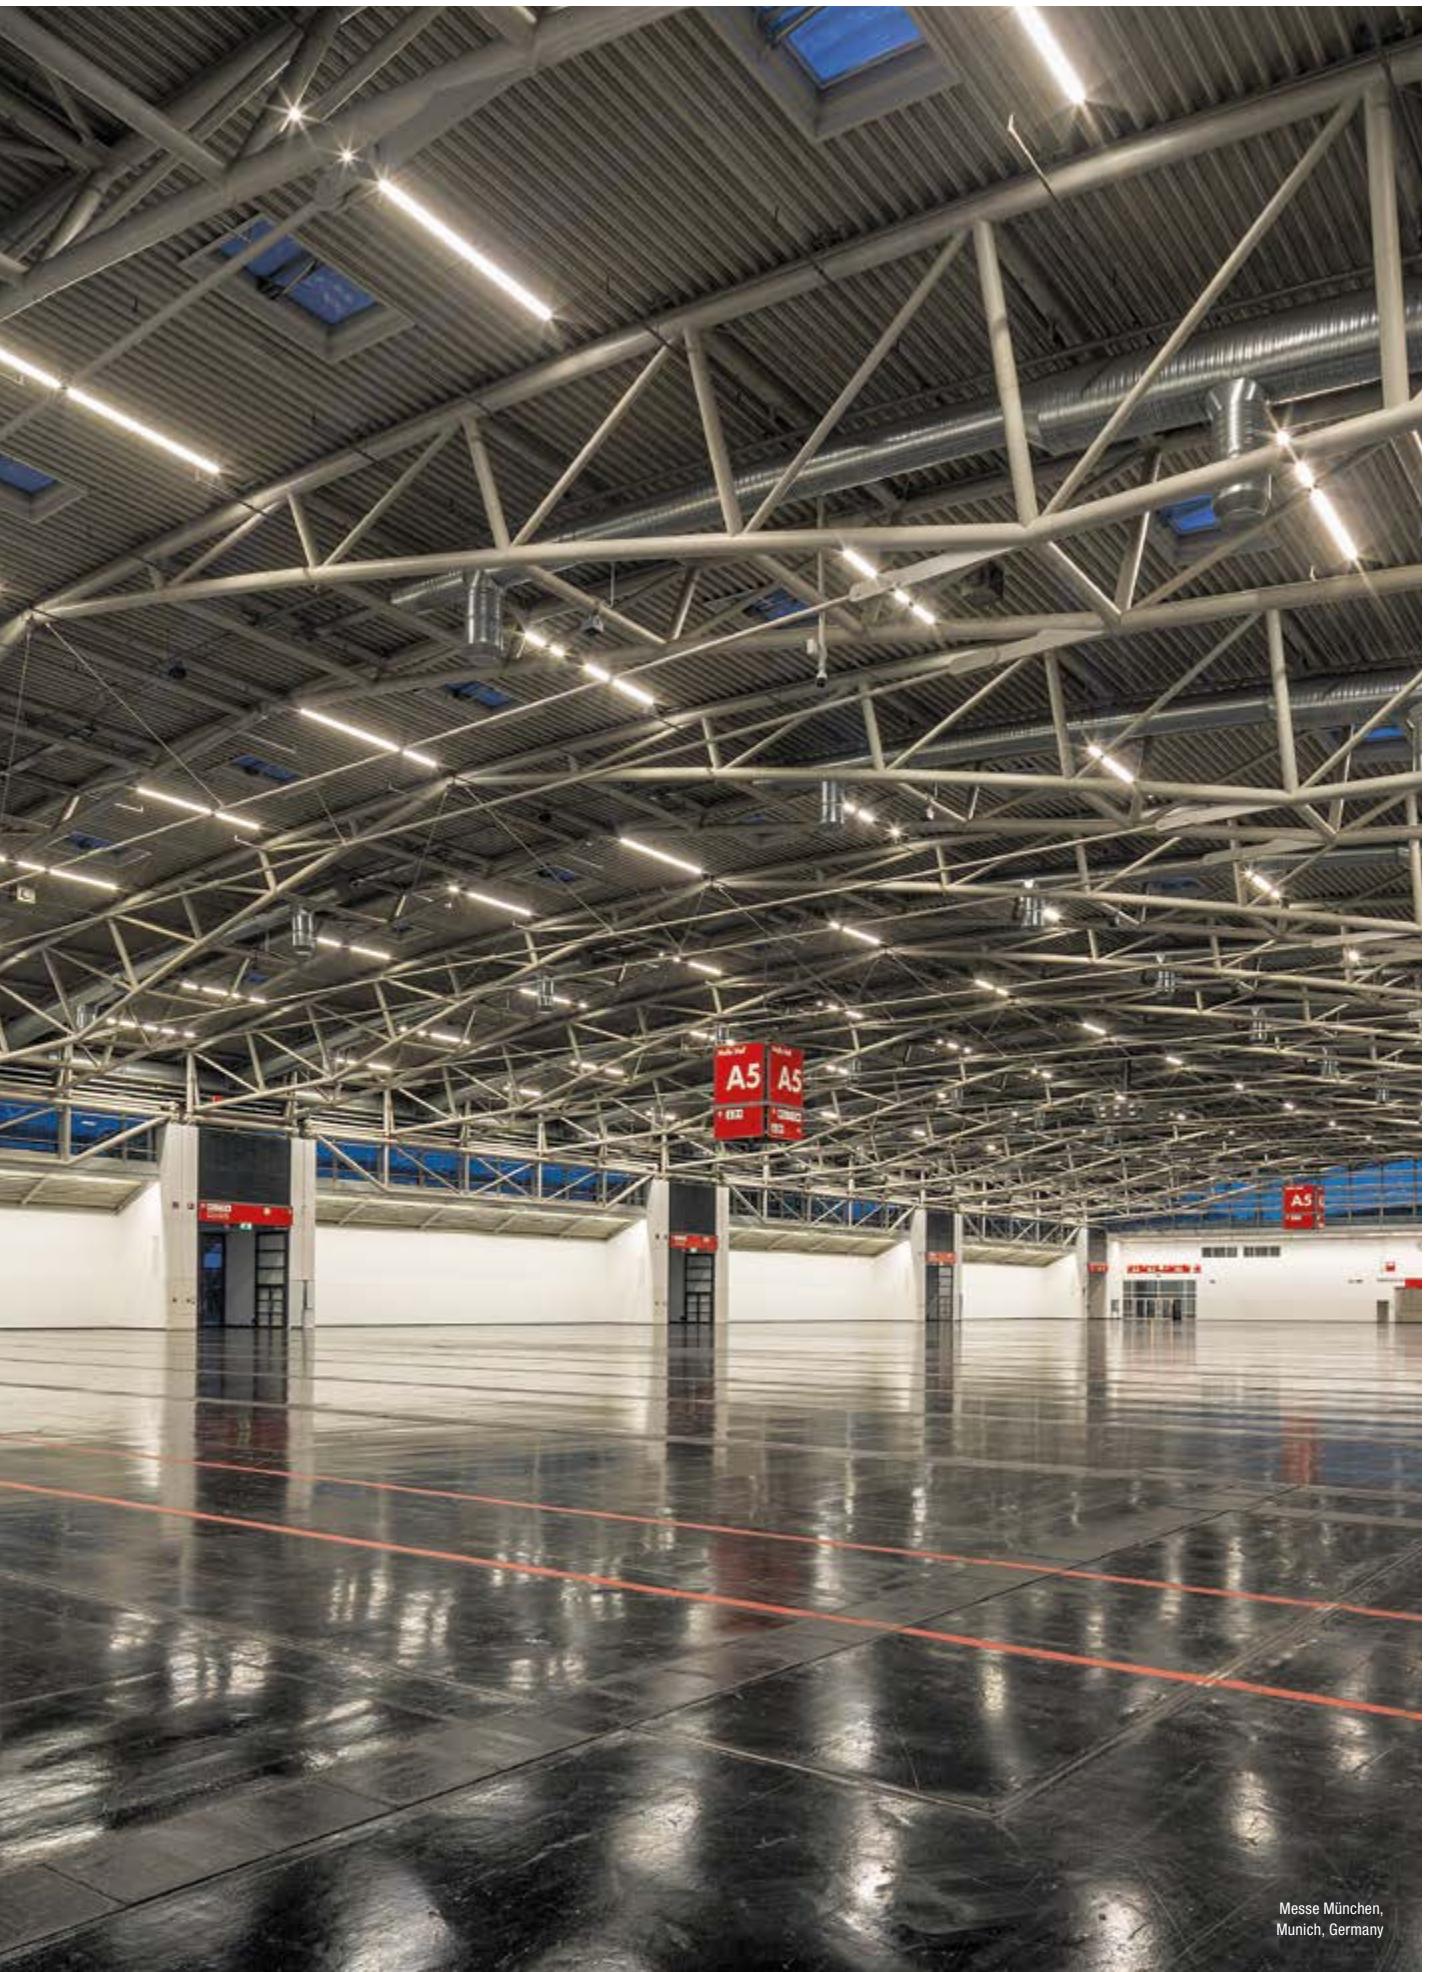

<https://www.ridi.de/en/service/ridi-linia-configurator-online>

It has the following features to make configuring your system easy:

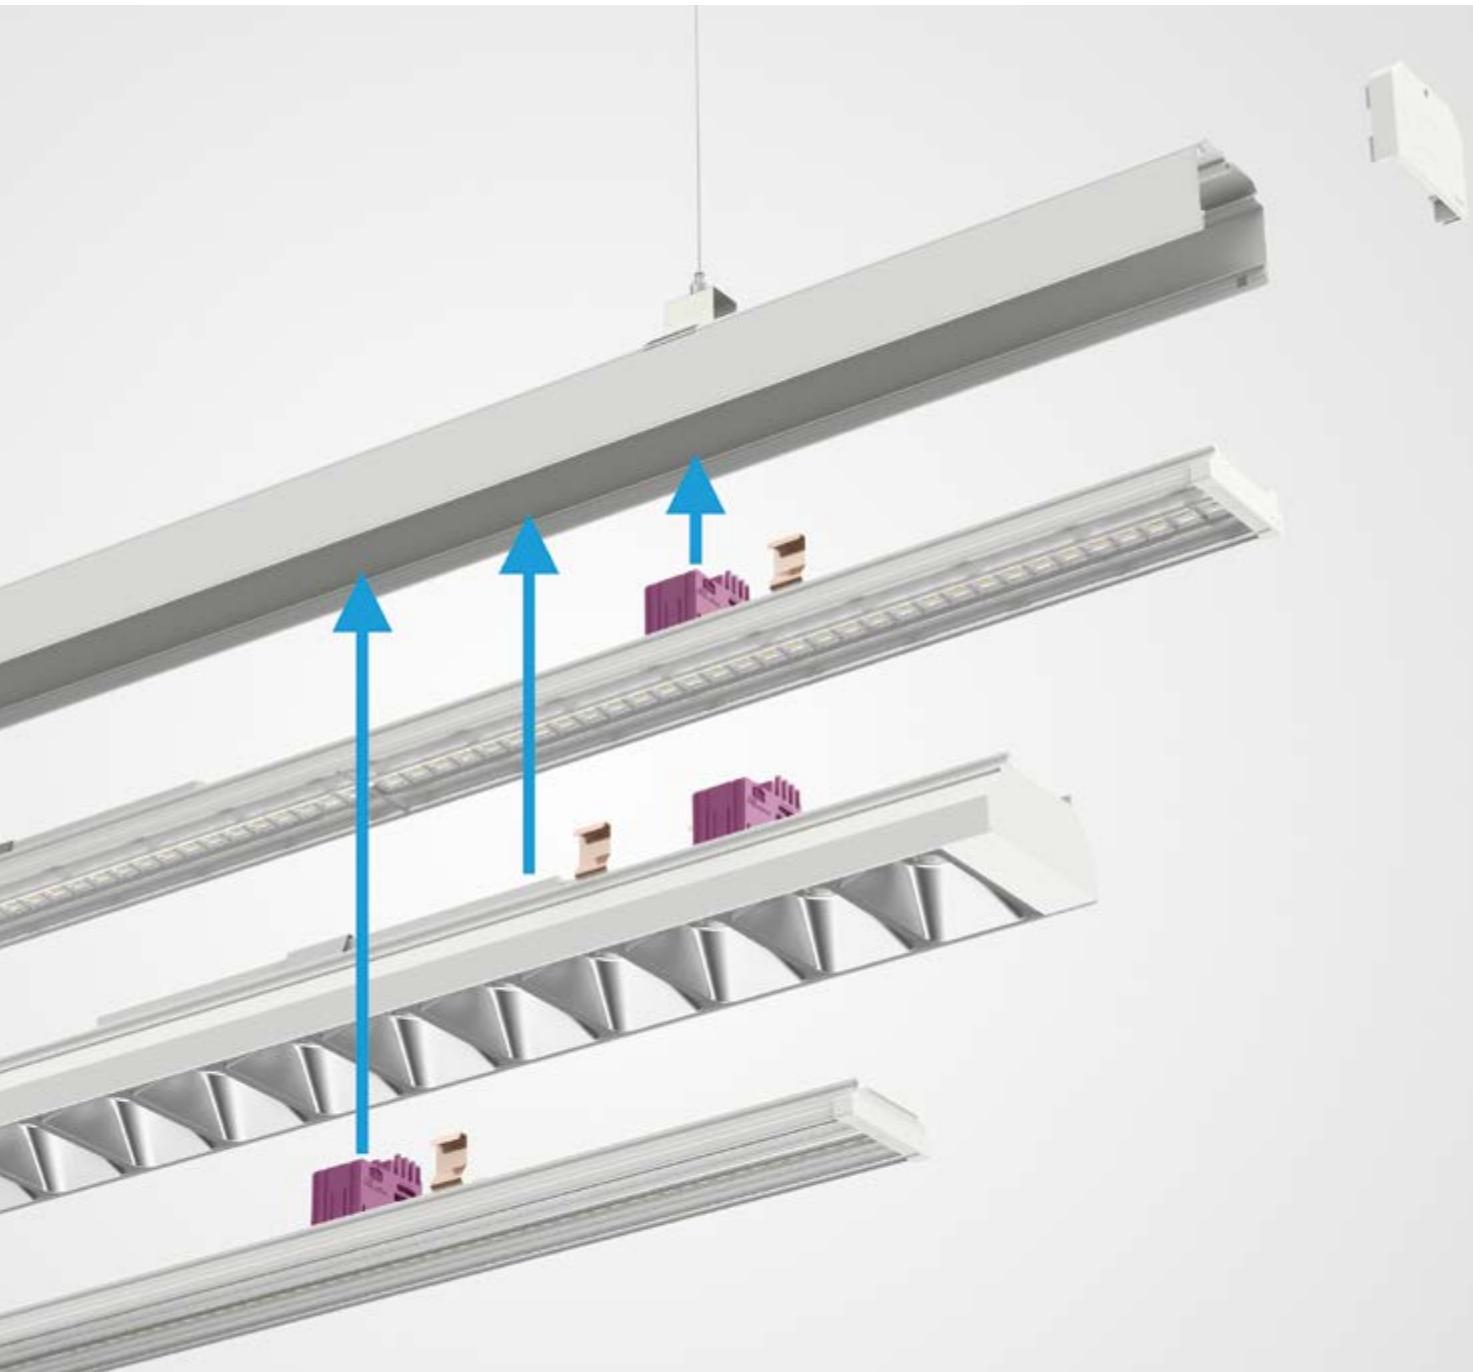

- Customisable configuration
- Create multiple continuous-row lighting systems
- Create tender specifications and parts lists

Go to continuous-row lighting system configurator

Messe München,
Munich, Germany

PORTFOLIO: GEAR TRAYS

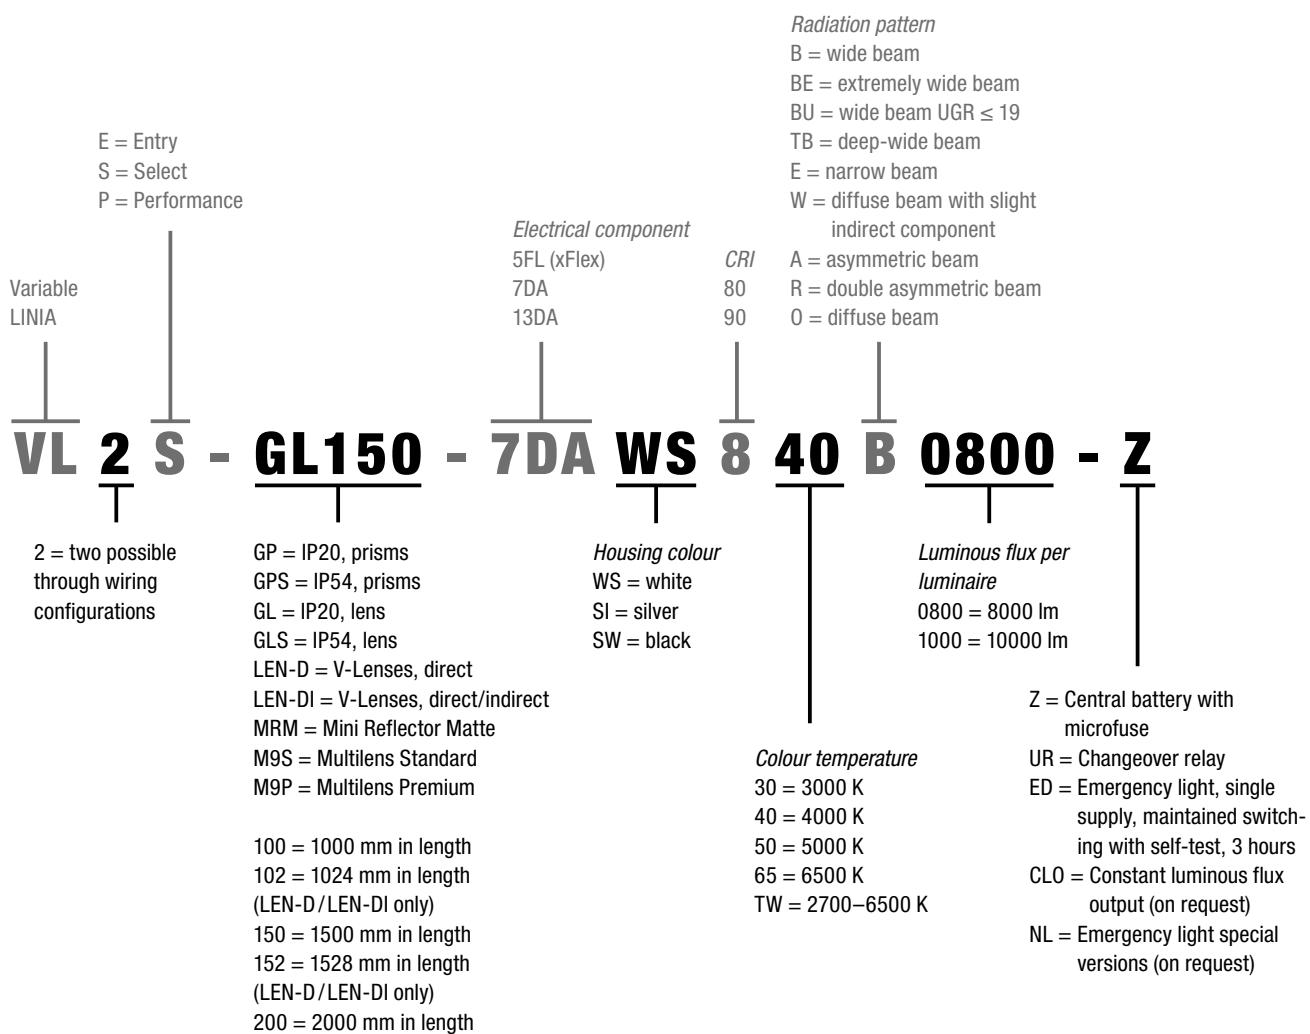

In addition to a wide range of optics and light distribution patterns, the gear trays of the RIDI LINIA EVO continuous-row lighting systems offer innovative solutions for a variety of lighting applications. With its proven modular system, it enables flexible configurations and a wide variety of uses.

- Gear trays up to 206 lm/W
- Glare-free working with gear trays with a UGR ≤ 19
- 2-metre gear tray that enables optimised, quick project implementation

Thanks to the perfect interplay between optics + LED technology, coupled with a long service life of up to 100,000 operating hours, RIDI LINIA EVO is sustainable and efficient in every respect.

Wide variety of uses in industrial buildings, offices or public offices. Combining innovation with proven technology, this continuous-row lighting system provides the ideal lighting solution for demanding applications.

Explanation of type designations

SERVICE OVERVIEW

OUR PACKAGES

PERFORMANCE VL2P

Maximum output and impressive light quality with a long service life, top efficiency, increased CRI and tunable white – perfect PERFORMANCE

Max. luminous flux	20,000 lm
Efficiency	Up to 206 lm/W
Service life L80B50	100,000 h
Protection rating	IP20 + IP54
Colour temperature	3000 K, 4000 K, 5000 K, 6500 K, 2700-6500 K
Housing colours	white, silver, black
CRI	80, 90

SELECT VL2S

Wide range of applications with high output and reliable service life – the perfect choice: SELECT

Max. luminous flux	17,000 lm
Efficiency	Up to 191 lm/W
Service life L80B50	100,000 h
Protection rating	IP20 + IP54
Housing colours	white, silver, black
Colour temperature	3000 K, 4000 K, 5000 K, 6500 K
CRI	80

ENTRY VL2E

Product tailored for basic projects with an excellent price-performance ratio – easy ENTRY

Max. luminous flux	13,000 lm
Efficiency	Up to 170 lm/W
Service life L80B50	50,000 h
Protection rating	IP20
Housing colours	white
Colour temperature	4000 K
CRI	80

xFlex = adjustable luminous flux/5-core | On/Off | DALI-2 = dimmable/7-core

Recommended application:
Retail, industry, logistics, data centre

Discover additional items and housing colours on
our RIDI LINIA EVO page

FACTS**The universal solution**

- Suitable for heights up to 10 metres
- Symmetric light distribution
- UGR optimisation for glare-free light (≤ 22)

SELECT

Housing colours: white / silver / black

Light colours: 830 / 840 / 865

Light distribution: opal diffuser with 8% indirect component

FACTS

Diffuser with 8% indirect component

- Suitable for heights up to 5 metres
- Excellent indirect light component of 8%
- Ideal for spaces with low ceilings

SELECT

Housing colours: white / silver / black
Light colours: 830 / 840 / 865

Event space,
Balingen, Germany

VL2.-GLS...BU...

Light distribution: BU wide beam UGR lens optics

FACTS

Excellent glare reduction, robust protection

- Suitable for heights up to 6 metres
- Excellent glare reduction with UGR ≤ 19 (up to 7000 lm) or UGR ≤ 22 at high luminous flux, combined with protection rating IP54
- Improved work environment thanks to premium light quality

PERFORMANCE

Housing colours: white / silver / black
Light colours: 830 / 840 / 850 / 865 / 8TW

For more information on our PERFORMANCE package, please visit page 30

Item number	Designation	Switch type	Luminous flux [lm]	Output [W]	Efficiency [lm/W]	Length [mm]	Width [mm]	Height [mm]

VL2.-GLS...E...

Light distribution: E narrow beam lens optics

FACTS

Precise light, robust protection

- Narrow beam optics for precise illumination
- IP54 dust- and splashproof
- Mounting height up to 12 m
- Excellent glare reduction with UGR ≤ 19 or ≤ 22 at high luminous flux

PERFORMANCE

Housing colours: white / silver / black
Light colours: 830 / 840 / 850 / 865 / 8TW

For more information on our PERFORMANCE package, please visit page 30

Item number	Designation	Switch type	Luminous flux [lm]	Output [W]	Efficiency [lm/W]	Length [mm]	Width [mm]	Height [mm]

xFlex = adjustable luminous flux/5-core | DALI-2 = dimmable/7-core

Recommended application:
Retail, industry, data centre

Discover additional items and housing colours on
our RIDI LINIA EVO page

VL2.-GFS...OS...

Light distribution: OS wide beam panel

FACTS

Combines wide beam and diffuse light distribution

- Ideal for sensitive surfaces: no visible LED points
- Perfect for low ceilings thanks to optimal light distribution
- Excellent glare reduction for maximum visual comfort

SELECT

Housing colours: white / silver / black
Light colours: 830 / 840 / 865

For more information on our SELECT package,

PORTFOLIO: SPOTLIGHTS

Bestsellers take centre stage

The spotlight range in the RIDI LINIA EVO series allows products to be flexibly and effortlessly integrated into the trunking. With precision aiming and high colour rendering, the spotlights put current offers and sale items at centre stage. The coordinated colour temperature emphasises the natural, fresh look of food products – ideal for fruits, vegetables, cheese, meats, delicacies, baked goods and fish.

Explanation of type designations

VL2MF-CIRQUA

SPOT 17°

Housing colours: white / silver / black
Light colours: 830/840

Spotlight module as single and double spotlight with Spot radiation pattern

Item number	Designation	Switch type	Luminous flux [lm]	Output [W]	Efficiency [lm/W]	Length [mm]	Width [mm]	Height [mm]
0321954//696	VL2MF-CIRQUA-L1-5NDWS840S0400	On/Off	3880	34	114	500	100	167
0321958//696	VL2MF-CIRQUA-L2-5NDWS840S0650	On/Off	6500	52	125	500	100	167
0331954//696	VL2MF-CIRQUA-L1-7DAWS840S0400	DALI	3880	34	114	500	100	167

MEDIUM 22°

Housing colours: white / silver / black
Light colours: 830/840

Spotlight module as single and double spotlight with Medium radiation pattern

Item number	Designation	Switch type	Luminous flux [lm]	Output [W]	Efficiency [lm/W]	Length [mm]	Width [mm]	Height [mm]
0321955//696	VL2MF-CIRQUA-L1-5NDWS840M0400	On/Off	3790	34	112	500	100	167
0321959//696	VL2MF-CIRQUA-L2-5NDWS840M0650	On/Off	6380	52	123	500	100	167
0331955//696	VL2MF-CIRQUA-L1-7DAWS840M0400	DALI	3790	34	112	500	100	167

On/Off | DALI = dimmable/7-core

Recommended application:

Retail, office/education

FACTS

Versatile spotlight for every room design

- Two sizes: 6.5 cm and 10 cm in diameter
- Flexibility: single spotlight or double configuration
- Modern design: aesthetic and functional

FLOOD 36°

Housing colours: white / silver / black
Light colours: 830/840

Spotlight module as single and double
spotlight with Flood radiation pattern

Item number	Designation	Switch type	Luminous flux [lm]	Output [W]	Efficiency [lm/W]	Length [mm]	Width [mm]	Height [mm]
0321956//696	VL2MF-CIRQUA-L1-5NDWS840F0350	On/Off	3690	34	109	500	100	167

On/Off | DALI = dimmable/7-core

MODULES

DUMMY MODULE

Housing colours: white / silver / black

Dummy module for use with various electrical components

Item number	Designation	Colour	Length [mm]	Width [mm]	Height [mm]	Protection rating
2500050	VL2MF-BLIND500	traffic white, similar to RAL 9016	500	67	67	IP54

CONNECTION MODULE

Housing colours: white / silver / black

Connection module in 4A or 16A design for LINIA EVO trunking VL2TM

Item number	Designation	Colour	No. of cores	Length [mm]	Width [mm]	Height [mm]	Protection rating
2500052	VL2MF-A500-13-4A	traffic white, similar to RAL 9016	13	500	67	67	IP54

Item number	Designation	Colour	No. of cores	Length [mm]	Width [mm]	Height [mm]	Protection rating
2500053	VL2MF-A500-13-16A	traffic white, similar to RAL 9016	13	500	67	67	IP54

SOCKET MODULE

Housing colours: white / silver / black

Module insert: socket module for variable insertion between VL2 gear trays for commercially available safety plugs

Item number	Designation	Colour	No. of cores	Length [mm]	Width [mm]	Height [mm]	Protection rating
2500056	VL2MF-ST500-5	traffic white, similar to RAL 9016	5	500	64	87	IP20

TRACK MODULE

Housing colours: white / silver / black

Module insert: track module for variable insertion between VL2 gear trays for commercially available 3-phase spotlights.

Item number	Designation	Colour	No. of cores	Length [mm]	Width [mm]	Height [mm]	Protection rating
2500062	VL2MF-STS1000-7	traffic white, similar to RAL 9016	7	1000	64	62	IP20
2500063	VL2MF-STS1500-7	traffic white, similar to RAL 9016	7	1500	64	62	IP20

Item 2500062: length of 3-phase insert in gear tray 270 mm.

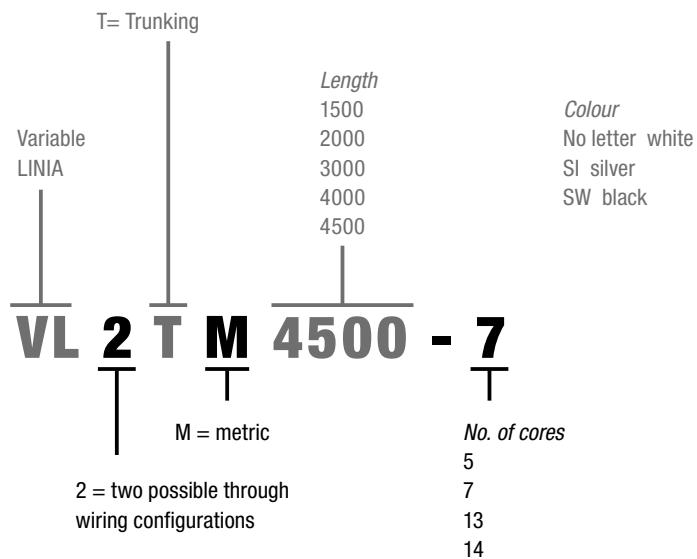

Item 2500063: length of 3-phase insert in gear tray 620 mm.

PORTFOLIO: TRUNKING

The trunking is an essential element of the RIDI LINIA EVO continuous-row lighting system. In combination with gear trays and modules, it is the basic system architecture. Available in silver, black and white, the trunking provides the structural basis for the system and allows the aesthetics to be adapted to a wide range of environments. The range of cores available in the system provides a variety of adjustment options for a wide range of applications. In this way, the RIDI LINIA EVO continuous-row lighting system combines functionality, design and flexibility to meet your personal modern lighting needs.

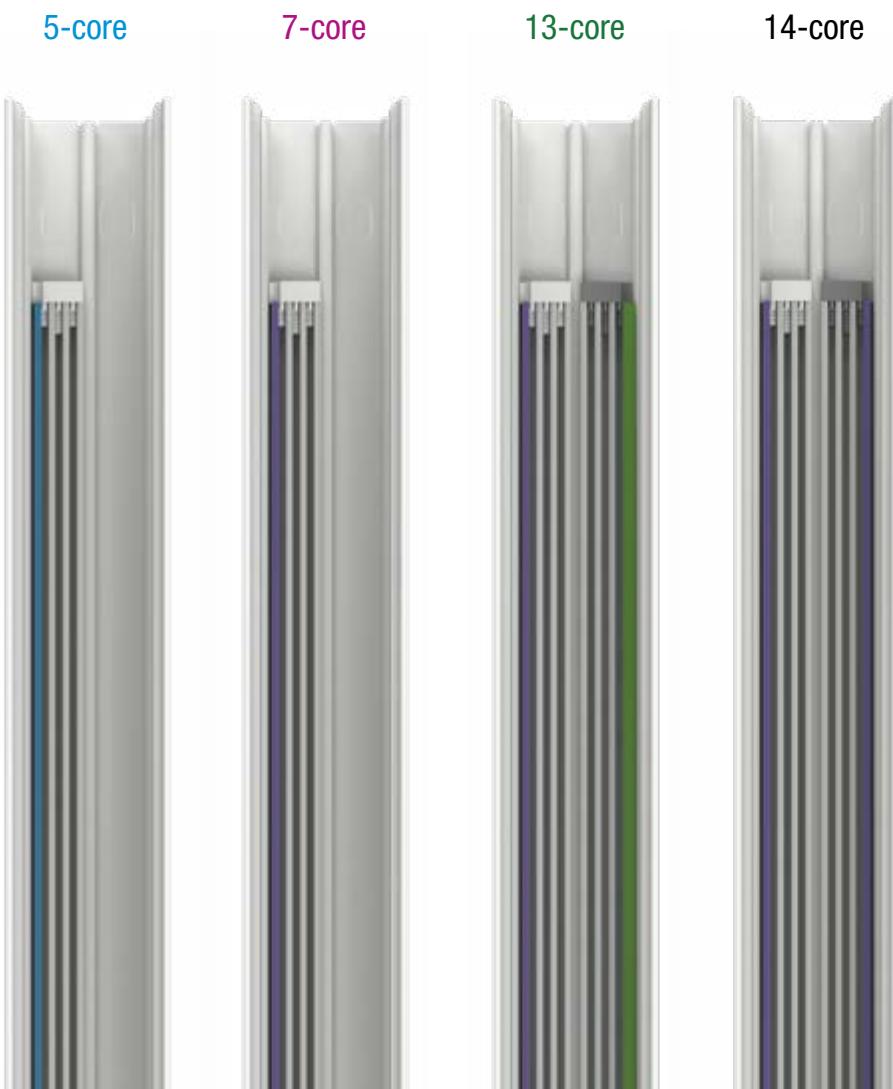

Explanation of type designations

TRUNKING

TRUNKING DESIGN WITH VERSATILE OPTIONS

- 5-core: ideal for cost-optimised projects
- 7-core: perfect for entry into light management
- 13-core: for projects with integrated emergency light function
- 14-core (2x7-core): two DALI three-phase circuits for flexible applications

JUNCTION CONNECTORS – DESIGNS MADE EASY WITH RIDI LINIA EVO

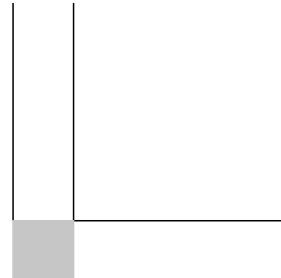

Connect junctions with our minimalistic and easy-to-mount L-/T-/X-shaped connectors.
Ideal for offices and a wide range of applications.

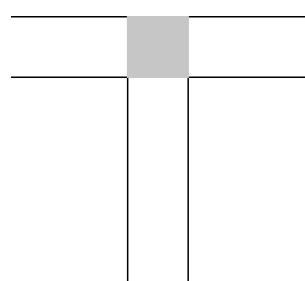

The newly developed junction connectors with their fine, flat design ensure a tight fit in the trunking and enhance the slim overall appearance of the RIDI LINIA EVO continuous-row lighting system. L-, T- and X-shaped connectors can be used to create a wide variety of right-angled designs. An accessory that must be ordered separately is available for the electrical connection of the trunking. Through wiring in 5-core, 7-core or 13-core design.

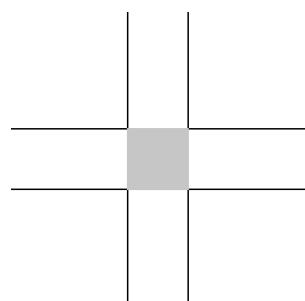

L CONNECTOR

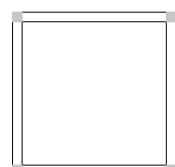

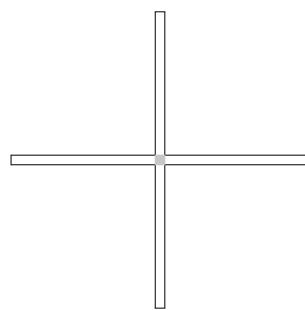

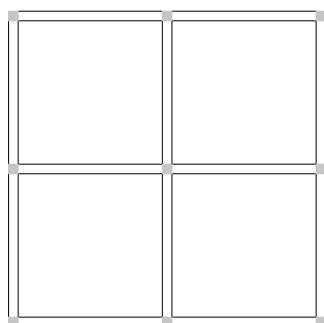

T CONNECTOR

X-SHAPED CONNECTOR

Multiple design options with L-, T- and X-shaped connectors

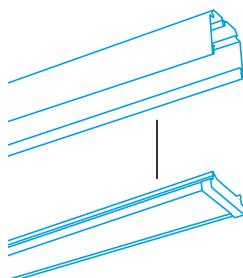

COMBINATION OPTIONS

RIDI LINIA EVO

5-core

BLUE = 5-core through wiring profile
Through wiring: 5 x 2.5 mm² for three-phase wiring
with phase selection on gear tray

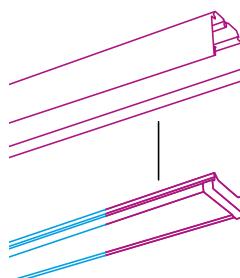

Trunking **VL2TM ...-5**
compatible with gear tray
VL2...G...-5 / modules VL2MF...-5

7-core

PURPLE = 7-core through wiring profile
Through wiring: 7 x 2.5 mm² for extra control cable or emergency light

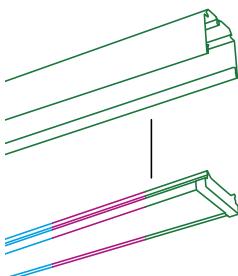

Trunking **VL2TM ...-7**
compatible with gear tray
VL2...G...-7 / modules VL2MF...-5
VL2...G...-7 / modules VL2MF...-7
(option for extra control cable or
emergency light)

13-core

PURPLE and GREEN = 13-core through wiring profile
Through wiring: 7 x 2.5 mm² (purple) and 6 x 2.5 mm² (green) for two independent emergency light circuits with sensors/light control components

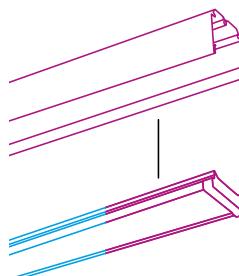

Trunking **VL2TM ...-13**
compatible with gear tray
VL2...G...-5 / modules VL2MF...-5
VL2...G...-7 / modules VL2MF...-7
VL2...G...-13 / modules VL2MF...-13
(option for extra control cable or emergency light)

14-core

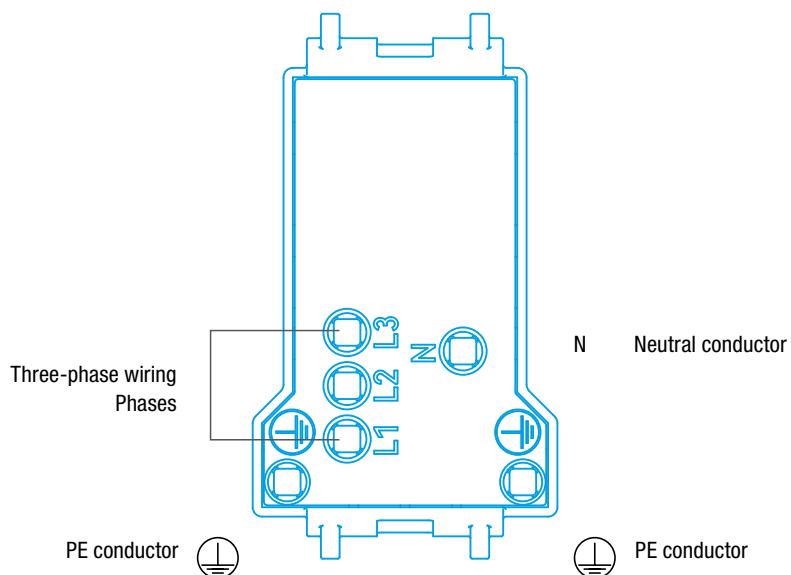

DOUBLE PURPLE = 14-core through wiring profile
Through wiring: 2 x 7 x 2.5 mm² (purple) for complex DALI requirements for two DALI three-phase circuits

Trunking **VL2TM ...-14**
compatible with gear tray
VL2...G...-5 / modules VL2MF...-5
VL2...G...-7 / modules VL2MF...-7
(Option for two DALI three-phase circuits)

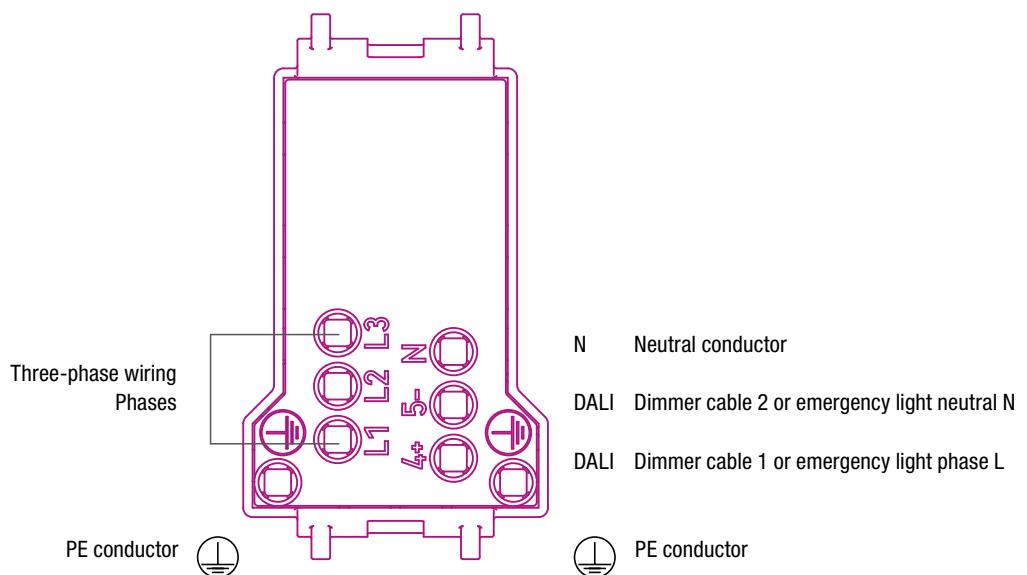

LAYOUT OF ELECTRICAL FEED UNIT/ TRUNKING

5-core

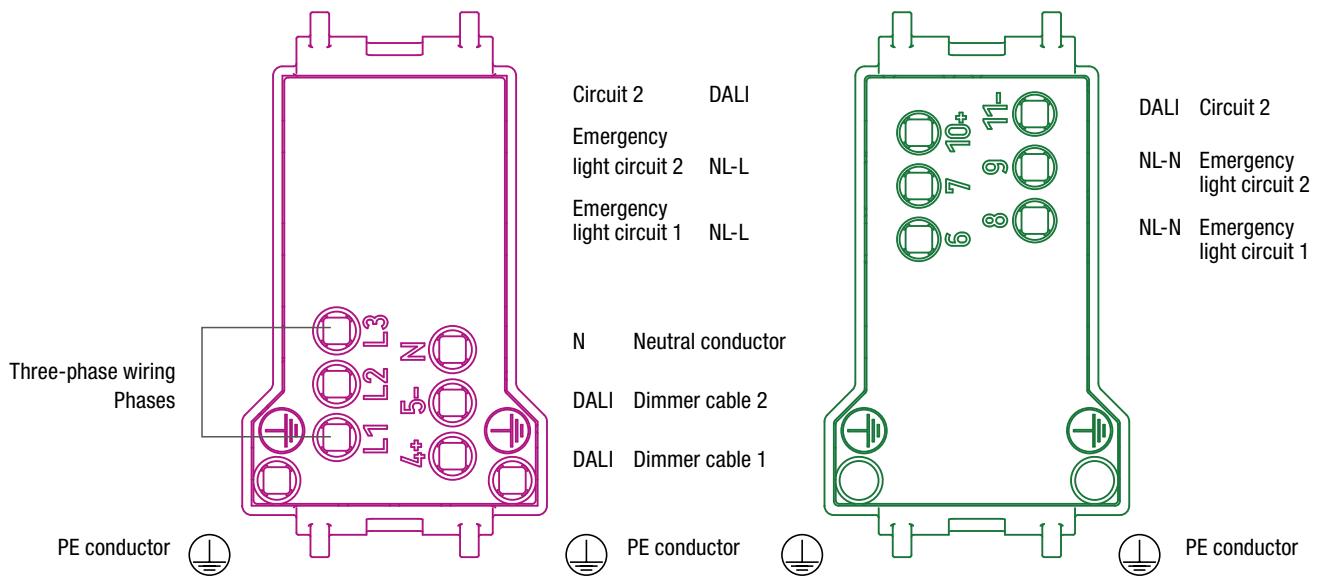

7-core

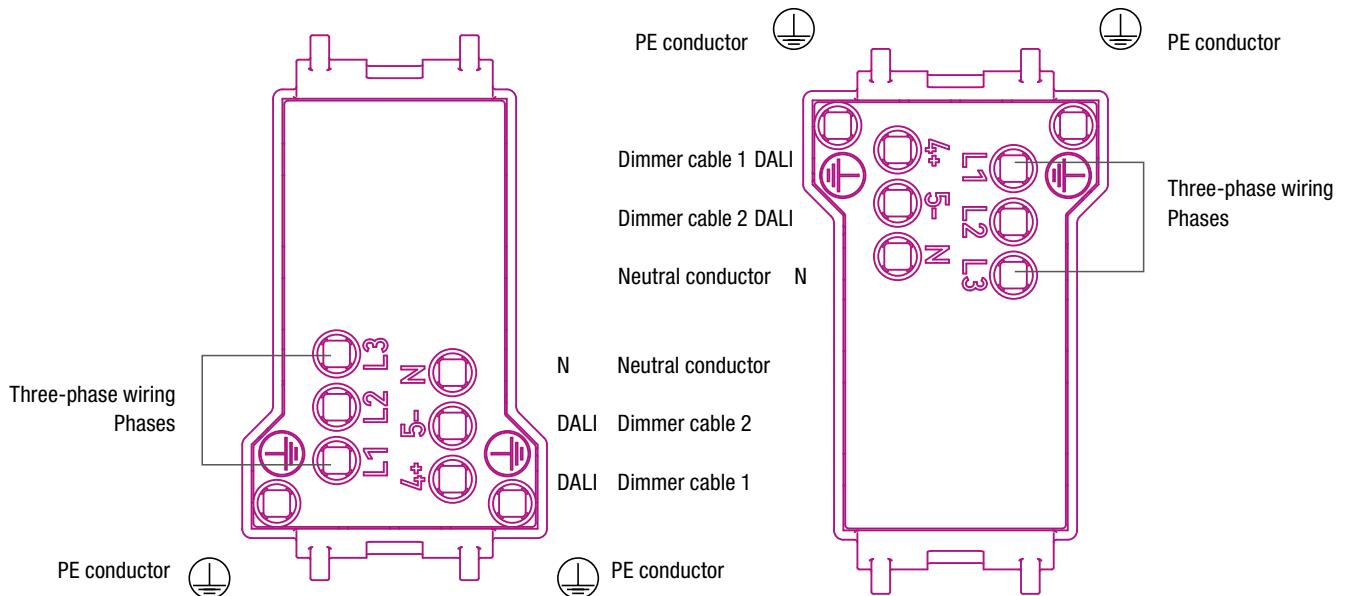

DALI cores can also be used as an emergency light circuit

13-core

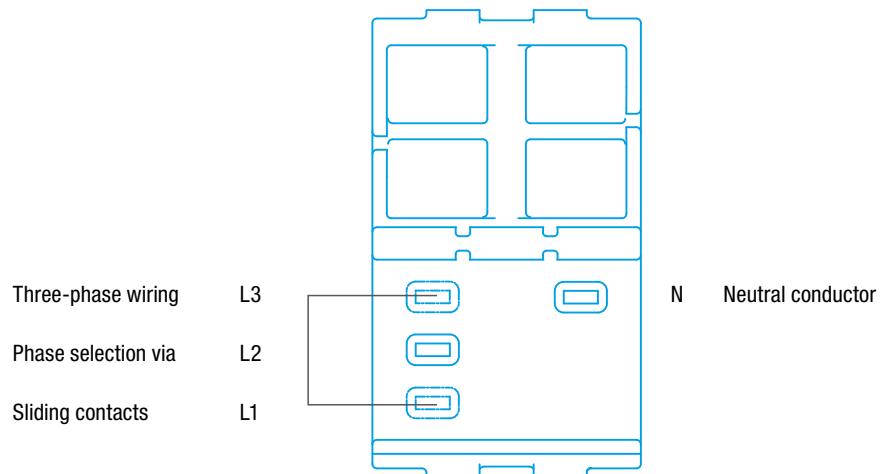

14-core

LAYOUT OF ELECTRICAL TAPS/GEAR TRAYS

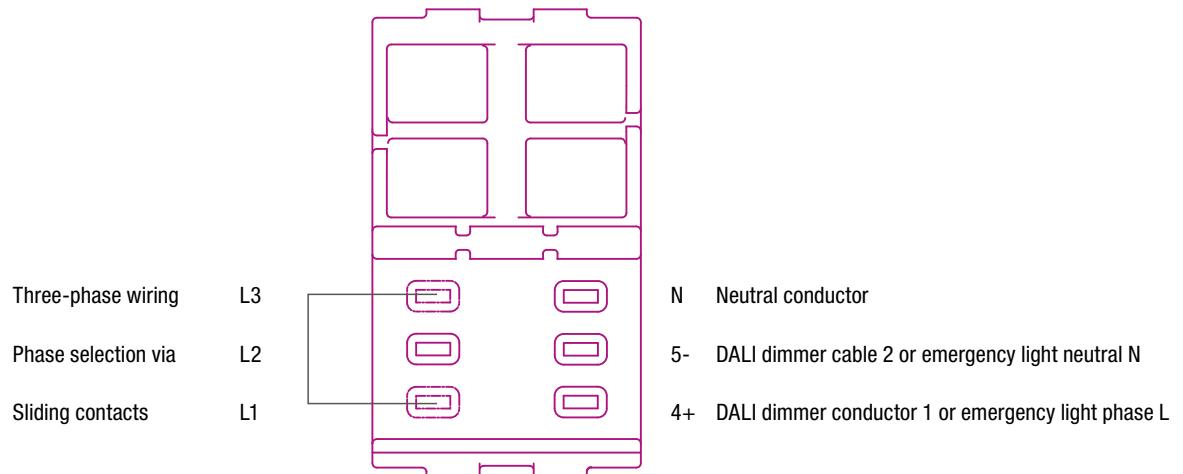

5-core

Standard wiring to L2

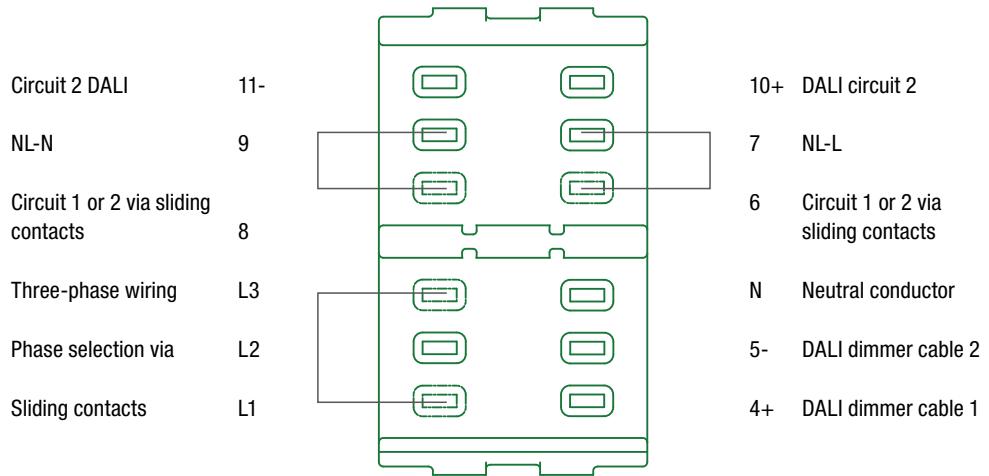

7-core

Standard wiring to L2

13-core

Standard wiring to L2 as well as 7 and 9

TRUNKING HANGERS

Item number	Designation	Product description
	2200031 VL2THDB	Hanger for ceiling mounting for RIDI LINIA EVO with cross bolt for securing, max. 20 kg, 1 pc.
	2200010 VL2THD	Hanger for ceiling mounting for RIDI LINIA EVO, max. 20 kg, 1 pc.
	2200032 VL2THDS	Chain suspension hanger for RIDI LINIA EVO with cross bolt for securing, max. 20 kg, 1 pc.
	2200008 VL2THK	Chain suspension hanger, adjustable, for RIDI LINIA EVO, max. 20 kg, 1 pc.
	2200018 VL2THSD	Cable suspension hanger 1.5 m for RIDI LINIA EVO and ceiling fastener for level and vaulted ceilings with up to 40° incline, max. 20 kg, 1 pc.
	2200018/L300 VL2THSD-3M	Cable suspension hanger 3.0 m for RIDI LINIA EVO and ceiling fastener for level and vaulted ceilings with up to 40° incline, max. 20 kg, 1 pc.
	2200018/L500 VL2THSD-5M	Cable suspension hanger 5.0 m for RIDI LINIA EVO and ceiling fastener for level and vaulted ceilings with up to 40° incline, max. 20 kg, 1 pc.
	2200033 VL2THW	Hanger for angled fastening for RIDI LINIA EVO, adjustable 30°, 45°, 60°, ceiling (wall), max. 20 kg, 1 pc.

TRUNKING HANGERS

Item number	Designation	Product description
	2200021 VL2THST	Cable suspension hanger 1.5 m for system ceilings for RIDI LINIA EVO, T profile 24–26 mm, 1 pc.
	2200021/L300 VL2THST-3M	Cable suspension hanger 3.0 m for system ceilings for RIDI LINIA EVO, T profile 24–26 mm, 1 pc.
	2200021/L500 VL2THST-5M	Cable suspension hanger 5.0 m for system ceilings for RIDI LINIA EVO, T profile 24–26 mm, 1 pc.
	2200020 VL2THT	System ceiling hanger for RIDI LINIA EVO, T profile 24–26 mm, 1 pc.
	2200034 VL2THSTP	Suspension cable hanger 1.5 m for trapezoidal sheet ceilings for RIDI LINIA EVO, adjustable, 1 pc.
	2200034/L300 VL2THSTP-3M	Suspension cable hanger 3.0 m for trapezoidal sheet ceilings for RIDI LINIA EVO, adjustable, 1 pc.
	2200034/L500 VL2THSTP-5M	Suspension cable hanger 5.0 m for trapezoidal sheet ceilings for RIDI LINIA EVO, adjustable, 1 pc.
	2200009 VL2THS	Cable suspension hanger 1.5 m and ring eyelet for RIDI LINIA EVO, adjustable, max. 20 kg, 1 pc.

ACCESSORIES

TRUNKING HANGERS

Item number	Designation	Product description
	2200009/L300 VL2THS-3M	Cable suspension hanger 3.0 m and ring eyelet for RIDI LINIA EVO, adjustable, max. 20 kg, 1 pc.
	2200009/L500 VL2THS-5M	Cable suspension hanger 5.0 m and ring eyelet for RIDI LINIA EVO, adjustable, max. 20 kg, 1 pc.
	0205887 VLBP	Plate with eyelet, ceiling fixture, max. 20 kg, 1 pc.
	0208347 VLSPSO-KH	Turnbuckle with eyelets + carabiner, adjustment 50 mm, max. 20 kg, 1 pc.
	0205888 VLKH	Carabiner hook, dimensions 50 mm x 25 mm x 5 mm, max. 20 kg, 1 pc.
	0200251 TRA 008	Chain, galvanised, max. 20 kg, weight 0.25 kg/m, 1 pc.
	0200906 SLKG	Chain S link, max. 20 kg per pc., 1 pc.

DUMMY COVERS

Item number	Designation	Product description
 1207288	VLBKM 1500	Dummy cover in extruded plastic, 1500 mm, fits RIDI LINIA/RIDI LINIA EVO trunking VLTM/VL2TM, traffic white, similar to RAL 9016, protection rating IP20
 1207295	VLBKM 2000	Dummy cover in extruded plastic, 2000 mm, fits RIDI LINIA/RIDI LINIA EVO trunking VLTM/VL2TM, traffic white, similar to RAL 9016, protection rating IP20
 1207296	VLBKM 2500	Dummy cover in extruded plastic, 2500 mm, fits RIDI LINIA/RIDI LINIA EVO trunking VLTM/VL2TM, traffic white, similar to RAL 9016, protection rating IP20
 1207297	VLBKM 4000	Dummy cover in extruded plastic, 4000 mm, fits RIDI LINIA/RIDI LINIA EVO trunking VLTM/VL2TM, traffic white, similar to RAL 9016, protection rating IP20
 1207289	VLBKM 4500	Dummy cover in extruded plastic, 4500 mm, fits RIDI LINIA/RIDI LINIA EVO trunking VLTM/VL2TM, traffic white, similar to RAL 9016, protection rating IP20
 1207292	VLSBKM 1500	Dummy cover in extruded plastic, 1500 mm, fits RIDI LINIA/RIDI LINIA EVO trunking VLTM/VL2TM, traffic white, similar to RAL 9016, protection rating IP54
 1207301	VLSBKM 2000	Dummy cover in extruded plastic, 2000 mm, fits RIDI LINIA/RIDI LINIA EVO trunking VLTM/VL2TM, traffic white, similar to RAL 9016, protection rating IP54
 1207302	VLSBKM 2500	Dummy cover in extruded plastic, 2500 mm, fits RIDI LINIA/RIDI LINIA EVO trunking VLTM/VL2TM, traffic white, similar to RAL 9016, protection rating IP54
 1207303	VLSBKM 4000	Dummy cover in extruded plastic, 4000 mm, fits RIDI LINIA/RIDI LINIA EVO trunking VLTM/VL2TM, traffic white, similar to RAL 9016, protection rating IP54

	2200007 VL2T-SFK	Through wiring end cap, right and left, for RIDI LINIA EVO VL2T, 1 set
	2200030 VL2TLA	Cable holder, exterior, for RIDI LINIA EVO, max. 2x Ø13 mm + 1x Ø11 mm, 1 pc.
	0208310 VLTLIK	Cable holder, interior, plastic, 10 pcs., observe regulations

FLEXIBILITY & SAFETY – EMERGENCY LIGHTING SOLUTIONS FOR THE RIDI LINIA EVO CONTINUOUS-ROW LIGHTING SYSTEM

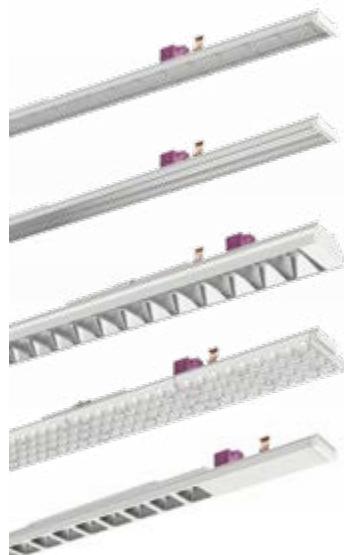

When designing your lighting solution, it is essential to consider means for life-saving emergency lighting in the event of a power failure. The modularity and flexibility of the RIDI LINIA EVO continuous-row lighting system is also reflected in the available module inserts, enabling comprehensive lighting solutions.

Whether with a self-contained battery or a central battery design for connection to a central emergency lighting supply system, we provide emergency lights and emergency sign luminaire module inserts to suit every application.

SELF-CONTAINED BATTERY EMERGENCY LUMINAIRE MODULE INSERTS

Self-contained battery emergency luminaire module inserts for escape route lighting. Easy to mount in trunking VL2TM.

VL2E/S/P LED gear tray for escape route lighting

All VL2E/S/P LED gear trays are equipped with a fully automated emergency light element with built-in self-testing device and visual status display (red/green LED). Designed for maintained operation and equipped with one maintenance-free 3-hour battery.

VL2MF-NL-BNT module insert for escape route lighting

Emergency luminaire LED module insert for mounting in trunking VL2T. Module in extruded aluminium profile, white, silver (-SI) or black (-SW), powder-coated. Spring steel clips for fastening to the trunking. Incl. replaceable lenses (symmetrical, asymmetrical, escape route).

Additional design EB3:

Gear tray with self-contained battery emergency light element and maintenance-free NiMH battery for 3-hour non-maintained switching.

Additional design ED3:

Gear tray with self-contained battery emergency light element and maintenance-free NiMH battery for 3-hour maintained switching.

SELF-CONTAINED BATTERY EMERGENCY SIGN LUMINAIRE MODULE INSERTS

Self-contained battery emergency sign luminaire module inserts with emergency signs to indicate escape routes. Easy to mount in trunking VL2T.

VL2MF-HW module insert with emergency signs

Emergency sign luminaire LED module insert for mounting in trunking VL2T. Module in extruded aluminium profile, white, silver (-SI) or black (-SW), powder-coated. Spring steel clips for fastening to the trunking. Detection range 32 m. In designs type B (right/left arrow) and type C (down arrow). Emergency sign panel in UV-resistant PMMA.

Additional design ED:

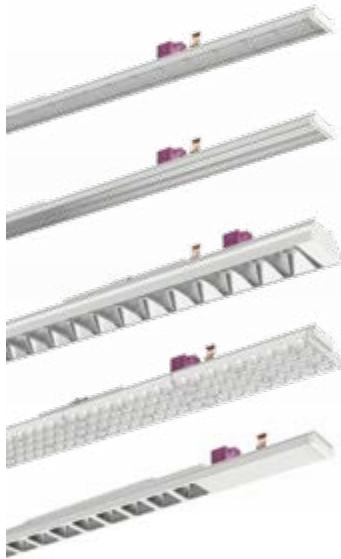

Gear tray with fully automatic emergency light element equipped with built-in self-testing device and visual status display (red/green LED). Designed for maintained operation and equipped with one maintenance-free 3-hour battery.

CENTRAL BATTERY EMERGENCY LUMINAIRE MODULE INSERTS

Central battery emergency luminaire module inserts for escape route lighting. For connection to a central emergency lighting supply system. Easy to mount in trunking VL2TM.

VL2E/S/P LED gear tray for escape route lighting

VL2E/S/P LED gear trays are designed for connection to a central emergency lighting supply system.

Additional design Z:

Gear tray for central standby power supply 230 V AC/DC (non-maintained switching). In emergency lighting mode: 100% luminous flux for switchable design; in DALI design: 15% luminous flux (programmable upon request).

Additional design UR:

Gear tray with changeover relay for central standby power supply 230 V AC/DC (maintained switching). In emergency lighting mode: 100% luminous flux for switchable design; in DALI design: 15% luminous flux (programmable upon request).

VL2MF-NL-BNT module insert for escape route lighting

Incl. replaceable lenses
(symmetrical, asymmetrical, escape route)

Emergency luminaire LED module insert for mounting in trunking VL2T. Module in extruded aluminium profile, white, silver (-SI) or black (-SW), powder-coated. Spring steel clips for fastening to the trunking. Incl. replaceable lenses (symmetrical, asymmetrical, escape route)

Additional design Z:

Gear tray for central standby power supply 230 V AC/DC (non-maintained switching).

Additional design UR:

Gear tray with changeover relay for central standby power supply 230 V AC/DC (maintained switching).

CENTRAL BATTERY EMERGENCY SIGN LUMINAIRE MODULE INSERTS

Central battery emergency sign luminaire module inserts with emergency signs to indicate escape routes.

Easy to mount in trunking VL2T.

VL2MF-HW module insert with emergency signs

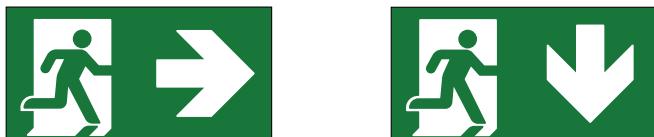

Emergency sign luminaire LED module insert for mounting in trunking VL2T. Module in extruded aluminium profile, white, silver (-SI) or black (-SW), powder-coated. Spring steel clips for fastening to the trunking. Detection range 32 m. In designs type B (right/left arrow) and type C (down arrow). Emergency sign panel in UV-resistant PMMA.

Additional design Z:

Gear tray for central standby power supply 230 V AC/DC (non-maintained switching).

Additional design Z-UR:

Gear tray with changeover relay for central standby power supply 230 V AC/DC (maintained switching).

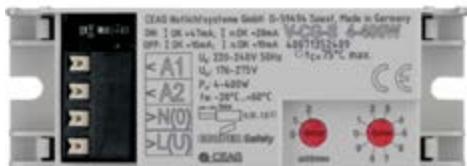

FULLY INTEGRATED PROJECT SOLUTIONS FOR CENTRAL EMERGENCY LIGHTING SUPPLY SYSTEMS

There is a lot to consider when you are designing a central emergency lighting system. Manufacturers of such systems who are highly specialised in the field, such as CEAG/EATON, INOTEC and Gessler, offer the right solution for every application.

For us as a lighting manufacturer, this means integrating emergency lights to illuminate escape routes with so-called monitoring modules from a given manufacturer for the project at hand, especially where the RIDI LINIA EVO continuous-row lighting system is used. These modules communicate with the central emergency lighting system.

The additional designs UR and Z-UR of the LINIA EVO continuous-row lighting system are designed for project-specific equipment like this to enable comprehensive lighting solutions.

Sicherheitstechnik GmbH

In addition to the integration of monitoring modules, INOTEC, CEAG/EATON and Gessler also offer complete emergency lights and emergency sign lights as module inserts for the RIDI LINIA EVO continuous-row lighting system.

LIGHTING CONTROL SOLUTIONS FOR LONG DISTANCES – FOR THE RIDI LINIA EVO CONTINUOUS-ROW LIGHTING SYSTEM

Much more than mere light control. RIDI Group's APCON light and building control system meets the requirements for lower energy consumption for lighting systems. It reduces CO₂ emissions and increases service life with features ranging from reducing power to completely switching the lighting system off via sensors. APCON offers great ease of use with elements such as touch panels, apps, dimmers, pushbutton couplers, as well as the option of connecting user-specific control panels. Adaptations to changes in use or expansions can be easily implemented and provide maximum flexibility.

Logistics service provider,
Hechingen, Germany

HIGH VARIETY OF FUNCTIONS

The limitless possibilities of the RIDI LINIA EVO continuous-row lighting system are matched by the wide range of functions offered by the APCON light and building control system. The selection begins with simple motion detection and extends to customer-specific requirements, such as building access control or blind control.

APCON EASY

VL2MF-S500 MODULE INSERTS WITH PRESENCE AND LIGHT SENSORS

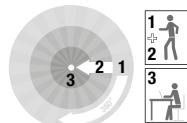

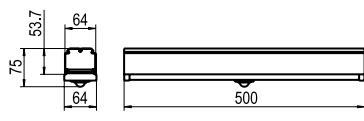

Switch sensors

VL2MF gear tray with master presence sensor for mounting in trunking, switching output for max. 300 W LED power. Daylight-dependent presence detection with adjustable daylight threshold. Setting and configuration via B.E.G. One app and Bluetooth/infra-red adapter, item no. 0209282. Expanded field of detection by connecting up to 8 slave sensors. Gear tray in extruded aluminium profile, white (similar to RAL 9016), silver (-SI) or black (-SW), powder-coated. Spring steel clips for fastening to the trunking. The VL2MF modules can be variably positioned between the VL2 gear trays. Electrical adapter for flexible tapping of through wiring in the trunking. Colour and visual coding for easy mounting. Mechanical coding to prevent incorrect mounting (anti-twist safeguard). Incl. cover louvres/blinds to restrict the sensor field of detection.

DALI-2 broadcast sensors

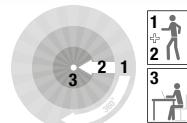

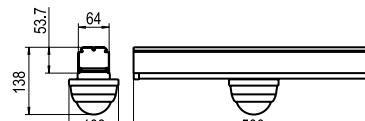

VL2MF gear tray with DALI-2 master presence sensor for mounting in trunking. DALI-2 output for max. 32 VL2 gear trays/DALI addresses. All connected gear trays are operated in broadcast mode and behave the same. Daylight-dependent presence detection with adjustable daylight threshold, base light value and follow-up times. Setting and configuration via B.E.G. One app and Bluetooth/infra-red adapter, item no. 0209282. Expanded field of detection by connecting up to 8 slave sensors. Gear tray in extruded aluminium profile, white (similar to RAL 9016), silver (-SI) or black (-SW), powder-coated. Spring steel clips for fastening to the trunking. The VL2MF modules can be variably positioned between the VL2 gear trays. Electrical adapter for flexible tapping of through wiring in the trunking. Colour and visual coding for easy mounting. Mechanical coding to prevent incorrect mounting (anti-twist safeguard). Incl. cover louvres/blinds to restrict the sensor field of detection.

APCON EASY BLE

VL2MF-S500 MODULE INSERTS WITH PRESENCE AND LIGHT SENSORS

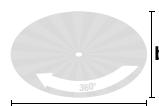

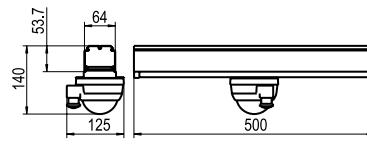

VL2MF gear tray with Bluetooth Low Energy (BLE) light and presence sensor. Optionally suitable for use as a presence sensor and/or light sensor in a Casambi network. Max. 32 connected DALI gear trays can be controlled directly by the master sensor via the integrated DALI-2 interface in broadcast mode (all luminaires behave the same). Expansion sensors do not have a DALI-2 interface, but have the same functionality and can also be used to expand the detection range of the master sensor. Configurable via the Casambi app. Gear tray in extruded aluminium profile, white (similar to RAL 9016), silver (-SI) or black (-SW), powder-coated. Spring steel clips for fastening to the trunking. The VL2MF modules can be variably positioned between the VL2 gear trays. Electrical adapter for flexible tapping of through wiring in the trunking. Colour and visual coding for easy mounting. Mechanical coding to prevent incorrect mounting (anti-twist safeguard). Incl. cover louvres/blinds to restrict the sensor field of detection.

Hybridbox Complexity made simple, organised and flexible Clustering

The APCON VL2MF HYBRIDBOX allows you to consolidate the standard DALI gear trays in your RIDI LINIA continuous-row lighting system into a cluster, i.e. an APCON EASY BLE/Casambi address, which makes comprehensive lighting solutions more organised and allows for intelligent control and monitoring – this is HYBRIDBOX clustering. The finer the cluster grid is planned, the more flexibility you will have for later changes to grouping or repurposing.

This means that the DALI gear trays are operated downstream of the HYBRIDBOX in broadcast mode, i.e. they all behave the same. This makes commissioning quick and maintenance easy. No complicated addressing or grouping is required for expansions or after a gear tray or driver has been replaced.

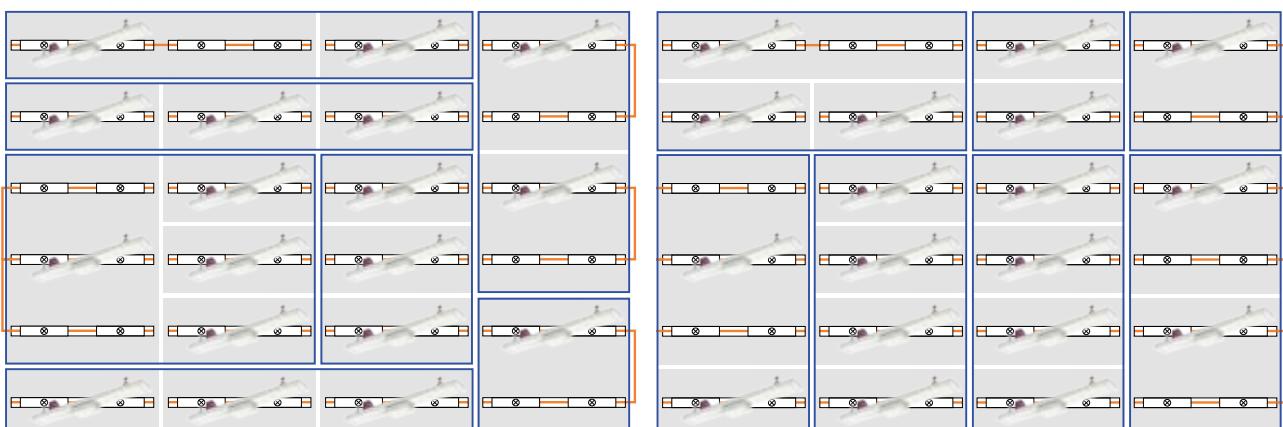

The HYBRIDBOXES, i.e. the individual gear tray clusters, can also be consolidated into different groups to be controlled and monitored together. If you repurpose your system, the groups can be deleted and rearranged to meet whatever your new requirements are.

OPEN-PLAN OFFICE

Presence detection – daylight-dependent control – time-based control – scene control – customisable light values

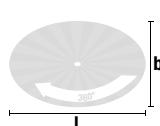

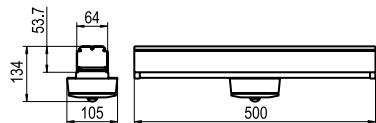

The APCON EASY BLE – Casambi wireless light control system is based on Bluetooth Low Energy (BLE) technology. The components are connected in a mesh network, allowing control signals to be passed on within the network. This design enables large ranges between participants. In buildings, the range is significantly reduced due to the presence of reinforced concrete, structural elements and other sources of interference. When designing your system, it is therefore critical to ensure that the individual components can connect, i.e. "mesh" well.

APCON INDIVIDUAL

VL2MF-S500 MODULE INSERTS WITH PRESENCE AND LIGHT SENSORS

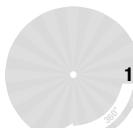

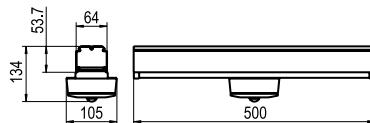

VL2MF gear tray with combined DALI-2 light and motion sensor for integration into an APCON INDIVIDUAL DALI light control system. Optionally usable as a motion sensor and/or light sensor. Combinable with other APCON INDIVIDUAL components, such as APCON pushbutton couplers and operating elements, as well as other APCON sensors to expand the field of detection. The activated, integrated application controller can be reconfigured to be in instance mode. Configuration via the required APCON interface and the DALI Cockpit Mobile smartphone app or via the DALI Cockpit PC software. Gear tray in extruded aluminium profile, white (similar to RAL 9016), silver (-SI) or black (-SW), powder-coated. Spring steel clips for fastening to the trunking. The VL2MF modules can be variably positioned between the VL2 gear trays. Electrical adapter for flexible tapping of through wiring in the trunking. Colour and visual coding for easy mounting. Mechanical coding to prevent incorrect mounting (anti-twist safeguard).

YOUR SAVINGS POTENTIAL

Replacing existing lighting with efficient RIDI Group LED luminaires or incorporating the APCON light and building control system into the design of your new installation is a future-proof investment.

Advantages of a light and building control system

- Additional reduction of energy consumption
- Climate protection through CO₂ reduction
- Compliance with energy-saving regulations
- Subsidies
- Longer service life through minimised power use
- Easy operation
- Flexibility

New system with LED luminaires
(renovation of old system through 1:1
replacement)

Up to
65%
in savings

New system with LED luminaires
and presence control

Up to
70%
in savings

New system with LED luminaires,
presence control and daylight control/
shutdown

Up to
85%
in savings

SUSTAINABILITY

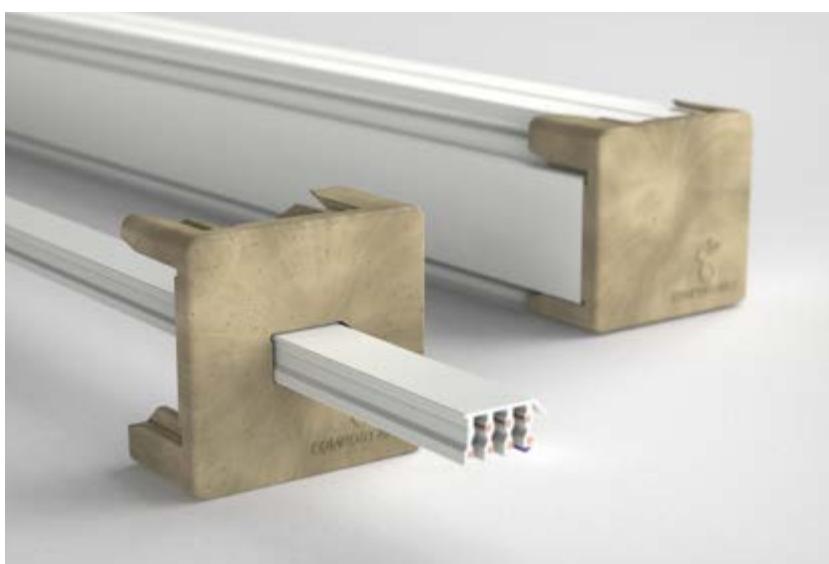

In 2023, RIDI made sustainable optimisations – with 1,600,000 metres of trunking produced, this represents a significant benefit for the environment. Highly efficient luminaire inserts and flexible through wiring are just some of RIDI LINIA EVO's sustainable advantages. Thanks to improved packaging technology, packaging was reduced by over 80% compared to the predecessor model, while maintaining the same level of product safety during shipping. What's more, the protective shipping caps for the trunking are made from compostable bioplastics.

Another plus for the environment: trunking and gear trays are manufactured in a highly automated plant at RIDI's headquarters in Jungingen. "For our customers, 'Made in Jungingen' means short-haul shipping and accordingly rapid availability, maximum flexibility when reacting to personal requirements, high environmental standards and 100 per cent quality," explains CEO Manfred Diez. He also emphasises: "It is also an expression of our dedication to our location, and an important signal for our employees."

Sustainably intelligent:

Made from bioplastics, the trunking packaging is environmentally friendly. Thanks to the use of innovative technology, the packaging materials have been significantly reduced, without compromising on product safety during shipping. This represents an overall reduction in CO₂ emissions of more than 80%, a sustainable benefit for both customers and the environment.

The protective shipping caps used to package the trunkings have a built-in cutting aid that makes it easy to precisely adjust the length of the through wiring on site. Finally, the multi-functional packaging and cutting guides are made from a compostable mixture consisting mainly of seaweed, wood pulp fibres, chalk and water.
