**RIDI**

**MORE THAN  
JUST LIGHTING**

RIDI offers a diverse selection of high-quality lighting solutions for all requirements. With an experienced team, RIDI develops customised concepts including modern lighting control – from planning to installation. Whether new build or refurbishment: RIDI accompanies your project from start to successful completion, ensuring perfect realisation.

**As a reliable service partner, RIDI is also your expert contact at all times.**

# RISING ENERGY COSTS AND THE BAN ON FLUORESCENT LAMPS

## Refurbishing lighting systems protects the environment and your wallet in the long term

In addition to rising energy costs and increased environmental awareness, the quest for greater energy efficiency and sustainability is fuelling refurbishment activities across the entire building sector. The ban on fluorescent lamps, which came into full effect in August 2023, means that action needs to be taken quickly in every existing installation. The investments will pay for themselves thanks to the energy saved and the lower maintenance costs compared to conventional lighting systems.

RIDI offers a wide range of luminaires that have been specially developed for refurbishment solutions. If an existing luminaire does not fit directly, uncomplicated modifications can usually be made to enable the lighting to be completely replaced. The RIDI portfolio also offers a wide range of luminaires eligible for subsidies in accordance with the BEG guidelines.

Munich trade fair centre refurbishment example

1.5 mio kWh

The Munich Trade Fair Centre has 18 exhibition halls whose lighting will be completely refurbished by the end of 2026. The RIDI LINIA continuous-row lighting system is being used for this purpose. Four halls have already been successfully refurbished. Short conversion times, a long service life and a halving of energy consumption offer considerable added value for the operator – if all halls are converted to LED, the annual electricity savings will total around 1.5 million kilowatt hours (kWh).

## “FUTURE THOUGHT, FUTURE MADE – RIDI AS A PIONEER FOR SUSTAINABLE PRODUCT DEVELOPMENT”

Sustainability characterises our society more than almost any other topic and the pressure to act to limit climate change is constantly growing. RIDI is committed to making a significant contribution to reducing greenhouse gas emissions.

RIDI is therefore continuously developing more efficient products that offer the usual RIDI quality through the use of high-quality materials – from the initial idea to the finished product.

Thanks to its extensive experience, energy-saving technologies and customised refurbishment concepts, RIDI actively supports the achievement of the European Union's climate targets.

RIDI develops and produces predominantly at its main plant in Jungingen in southern Germany.

Sustainability report  
2023

**Made in  
Germany**

### Genuine sustainability through intelligent functionality – The RIDI philosophy

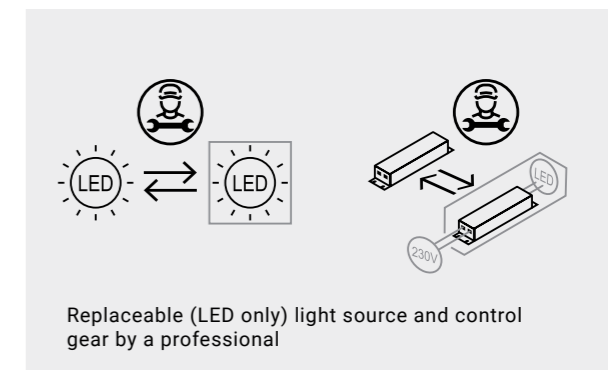

The rapid development of LED technology has revolutionised lighting technology. Right from the start. Back in 2010, RIDI set up its own 'LED Land' department with LED engineers and, with the market launch of the RIDI-TUBE as the first tool-free replaceable LED illuminant for new luminaires, carried out pioneering work and at the same time set new standards for sustainable product development.

### Efficient refurbishment right through to the end customer with the RIDI-TUBE

The RIDI-TUBE is not just an LED light source, but an entire sustainability statement. No screws, no plugs – just replace the TUBE. The actual luminaire remains in use. This protects the environment, saves valuable resources and ensures long-lasting, sustainable and future-proof lighting solutions. Thanks to the developed in-built resistor, the RIDI-TUBE automatically adjusts itself to the exact operating current required.

### Expertise in action – the RIDI ABR-BWS/EBR-BWS refurbishment products for sports facilities

Our ball-proof luminaire ABR-BWS/EBR-BWS offer a fast, efficient and sustainable refurbishment solution for sports facilities. Old lighting systems can be replaced without a trace thanks to identical fixing points. The same lighting effect as the predecessor product ensures unobtrusive replacement. Equipped with the new RAPID SWAP MODULES (RSM), the light source can be replaced easily and without tools, guaranteeing a long-lasting, sustainable solution for the future.

### Consistent development of repairable products

A fundamental component of the sustainability strategy is ensuring reparability in the development of new products and in product maintenance. This does more than simply fulfil the requirements of the Ecodesign Directive. The fundamentally repairable approach enables the long-term operation of the lighting system and thus optimises the use of the necessary resources.

#### Repairability Example PFSB2:

- LED board and driver can be replaced individually by a specialist
- Quick and easy disassembly
- Virtually maintenance-free

**Become part of the revolution and help shape the future of lighting. Discover inspiring, innovative solutions and find out how simple, sustainable and cost-efficient modern lighting can be realised – especially in refurbishment projects.**

## ” APCON – THE STRONG PARTNER FOR EVERY PROJECT “

The APCON lighting & building control system enables comprehensive, customised project solutions that are easy to implement and of high quality. APCON offers an intelligent and customised portfolio that covers a wide range of possibilities and is still easy to plan and use. The APCON components and the luminaires controlled by them are intelligent and networkable, ensuring flexible and efficient control.

### APCON EASY BLE – Efficient planning and control for demanding refurbishment projects

Reliable and uncomplicated planning is crucial for complex and customised refurbishment projects. The radio-based and hybrid APCON EASY BLE lighting control system offers the ideal solution for this, especially when switching and dimming without additional cables is required.

APCON EASY BLE enables the seamless combination of radio and cable, allowing hybrid solutions to be realised depending on the application. In addition to simple switching and dimming, the system also offers daylight and presence-dependent control options, which significantly increases efficiency and flexibility.

The system also supports a variety of advanced lighting control options, including RGB, RGBW, Tuneable White and circadian daylight sequences (Human Centric Lighting – HCL). A wide range of lighting control components are available, which can be conveniently configured and operated via a smartphone or tablet app.

APCON EASY BLE offers a high degree of functionality and flexibility for customised lighting solutions in refurbishment projects.

Lighting control solutions based on the established Casambi system

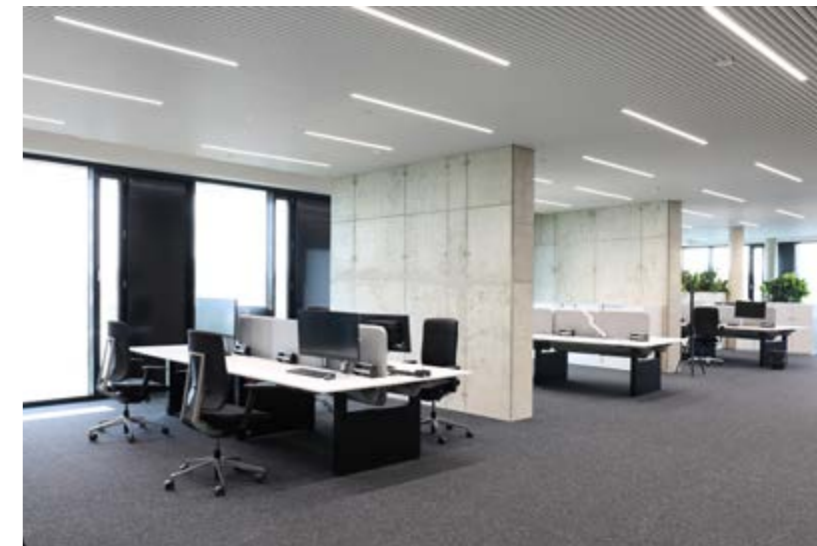

CASAMBI

## APCON SOLUTION PACKAGE ONE

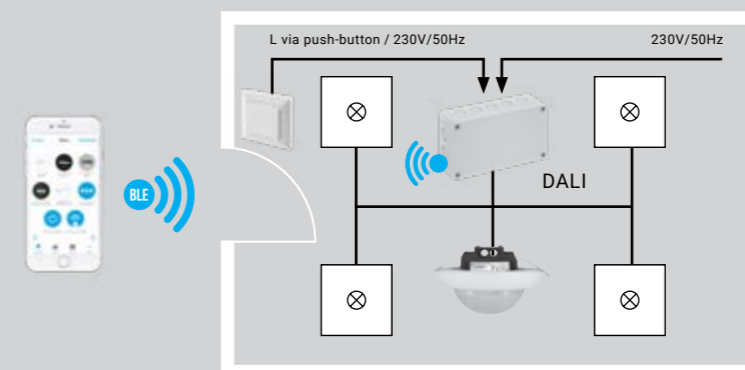

User-friendly room refurbishment solutions, reduced to the essentials

APCON SOLUTION PACKAGE ONE is the all-round kit for precise lighting control and includes a controller box and a sensor.

- APCON BLE HYBRIDBOX-RSM & APCON sensor in one box
- Daylight and / or presence-dependent control
- Option to connect a dimmer switch for switching on and off and individual dimming
- Connection of standard DALI luminaires and DALI luminaires for coloured light control
- Maintenance-friendly broadcast operation of the luminaires for simple commissioning
- Sensor with large detection field for low planning effort and reliable detection
- Based on the established Casambi system

APCON EASY BLE**

APCON EASY BLE lighting control solutions for long distances – for the RIDI LINIA continuous-row lighting system

**APCON EASY BLE in RIDI LINIA continuous-row lighting systems – realise medium to large-scale continuous-row lighting projects with just 5 articles!**

## APCON FOR RIDI LINIA CONTINUOUS-ROW LIGHTING SYSTEMS

**Efficient lighting control for long distances**

With the APCON VL2MF HYBRIDBOX, standard DALI gear trays of the RIDI LINIA continuous-row lighting system can be grouped into clusters – a single APCON EASY BLE/Casambi address. This innovative HYBRIDBOX clustering makes lighting solutions clearer, more intelligent and easier to control.

The finer the cluster grid is planned, the greater the flexibility for subsequent regrouping and changes of use. The DALI gear trays work behind the HYBRIDBOX in broadcast mode and all behave in the same way, which enables fast commissioning and simple maintenance. Complicated addressing and grouping is also no longer necessary when expanding or replacing device carriers and drivers.

The HYBRIDBOX clusters can be combined in different groups, controlled and monitored together. If utilisation changes, these groups can be easily dissolved and rearranged to meet current requirements.

## COMPLICATED AND TIME-CONSUMING LIGHTING CONTROL? NOT WITH APCON!

Experience how easy lighting control can be! Attend our free APCON workshops and receive comprehensive, precise information at first hand. Our experts will explain the crucial details and show you how to plan your projects efficiently and easily.

Secure your place now! All dates and information can be found here: [www.ridi-group.de/de/aktuelles/meldungen/seminare.html](http://www.ridi-group.de/de/aktuelles/meldungen/seminare.html) or by contacting your sales representative

# ALBA

” LIGHT FOR PEOPLE AND SPACE “

In combination with architecture, luminaires are important aspects of interior design for working and living environments. They provide ideal lighting, create a harmonious atmosphere and contribute to a sense of well-being. The focus is always on people. This is why the exceptional lighting quality of the ALBA family is so important. Available in many light colours with high colour rendering and in Tuneable White – ideal for achieving the desired lighting mood.

**ALBA – one design, one fit**

A range of luminaires in a standardised design language for every application – the downlights are available in various sizes 50 mm, 68 mm, 100 mm, 150 mm and 200 mm (recessed installation diameter). The housing is available in the timeless colours white or black, and the reflector is also available in a high-gloss specular finish. Swivelling versions round off the portfolio.

©fomulenc 777-stock.adobe.com

- 5 sizes (installation diameter 50 mm, 68 mm, 100 mm, 150 mm, 200 mm)
- 4 colour variants (housing colour, reflector)
- 4 light distributions (spot, medium, flood, super flood) for every application.

- FACTS**
- OUTSTANDING LIGHTING TECHNOLOGY**
- Brilliant 3-stage lighting technology
  - Highly efficient light mixing chamber
  - Precise lenses / diffuser disc for different beam angles
  - Customised, deep reflector

# ALBA

### Characteristics

If special requirements are placed on the illumination, ALBA uses special lenses in addition to the classic very wide beam light distribution with diffusing disc. Regardless of size and shape.

### High-quality materials

As a German manufacturer, RIDI Leuchten pays particular attention to the quality and durability of the materials and components used. The high quality awareness runs like a red thread through the entire development process of all products. Starting with the idea, through development to production and beyond.

### Flexible project planning

Regardless of complex building structures and high planning and technical requirements, ALBA downlights can be used to create customised concepts. With ALBA, planning and refurbishment projects impress with a uniformly designed lighting experience.

- Production in Germany
- Fast delivery
- High flexibility

**ALBA**

## ” ARKA – OPTIMAL FOR WORKING AND LEARNING “

### ARKA offers pleasant, glare-free light for classrooms and offices

The ARKA luminaire series redefines lighting in offices and school facilities. With its timeless and modern design, ARKA offers a stylish solution that can be seamlessly integrated into existing buildings for refurbishment as well as into new designs. ARKA is available in three versions – as a surface-mounted ceiling luminaire and pendant luminaire with a ceiling-illuminating indirect component and as a surface-mounted luminaire for panel lighting. The classic dimensions of the luminaire make it extremely versatile. ARKA creates a glare-free environment in which visual information can be perceived clearly and distinctly. This is particularly important in educational establishments and working environments, as it significantly improves the quality of work and learning.

### What does ARKA offer?

- Microprismatic, Continuous light-band-capable pendant and surface-mounted luminaire optimised for offices and education
- Attractive design thanks to the recessed illuminated surface
- ARKA-A direct beam surface-mounted as a microprismatic luminaire or wallwasher
- ARKA-P microprismatic direct and indirect beam pendant luminaire, switched together or dimmed
- xFlex versions with adjustable luminous flux levels or DALI with high efficiency
- Integrated sensor technology from the APCON EASY BLE portfolio (Casambi) controls up to 30 DALI luminaires via the master unit

Housing colours in white and silver

Light distribution in direct, direct-indirect and asymmetrical distribution versions

Clear design and maximum glare control thanks to the recessed light emission surface

Two classic lengths of 1.2 m and 1.5 m for versatile use

Optional connectors for length optimisation are available for use in renovation projects.

Continuous light-band capable due to space-less connection

Further information on  
ARKA

## ” THE RENOWNED LIGHT STRIP MADE IN JUNGINGEN “

RIDI has been a pioneer in the continuous-row lighting sector since 1987 and has continuously optimised the concept over the years. In 2024, RIDI LINIA EVO took continuous-row lighting technology to a new level. Our headquarters in Jungingen, at the foot of the Swabian Alb, is not only the origin of our lighting innovations, but also a guarantee of the highest quality – Made in Jungingen. The new RIDI LINIA EVO continuous-row lighting system not only offers a sustainable lighting solution, but is also characterised by quick installation, easy retrofitting and a well thought-out system. As a pioneering trailblazer, RIDI is ideally equipped to offer advanced lighting solutions for a bright future.

**RIDI LINIA EVO – an unbeatable strip light that raises efficiency to an unrivalled level. Equipped with state-of-the-art technology, RIDI LINIA EVO marks a milestone in the lighting industry.**

- Trunking up to 13-pole for emergency lighting and integration of sensors, other variants 14-pole (2x 7-pole for two DALI three-phase circuits)
- Unique DUO CONNECT connection concept for even faster installation
- Can be used in any application (up to protection class IP54)
- Gear trays can be used without collision at joints on the mounting rail
- Upgrade KIT for retrofitting escape signs or emergency lighting
- Suspension distances of up to 5 m

Further information on  
RIDI LINIA EVO

### VL2TM – The new trunking system

The new development of trunking and contact technology is an essential element in the RIDI LINIA EVO continuous-row lighting system. This innovation sets new standards for quality and efficiency in the field of continuous-row lighting production and offers numerous advantages. The trunking and gear tray are manufactured entirely on site in Jungingen, supported by new state-of-the-art, fully automated production facilities.

### Simple electrical installation

A modern solution for reliable and simple networking – the double chamber enables the insertion of one power cable (5- or 7-pole) or two power cables (13- or 14-pole).

### High flexibility

RIDI LINIA EVO offers flexible design options for trunking, gear trays and modules.

### Fast installation

The new suspension distance of up to 5 metres enables faster installation with less materials.

### Packaging

The carrier rail packaging is made more environmentally friendly through the use of bioplastics. The innovative packaging technology makes it possible to reduce the packaging material by more than 80 % without compromising transport protection. This helps to reduce overall CO2 emissions by more than 80% and has a positive impact on customers and the environment.

### DUO CONNECT – The new mounting rail connector

The new DUO CONNECT trunking connector combines two functions by combining the mechanical and electrical connector in one component. This practical solution significantly reduces the installation effort, saves time during preparation and enables effortless assembly. An advanced approach that combines efficiency and user-friendliness in one product.

### Collision-free installation at any point

With simplified press-in connection and a new internal seal, DUO CONNECT offers first-class protection up to protection class IP54.

### Internal seal

With protection class IP54, the seal is already attached to the DUO CONNECT trunking connector on the inside, this offers optimum protection and is only discreetly visible from the outside.

### VL2 – The new gear trays

The gear trays have undergone a comprehensive efficiency update, achieving impressive levels of up to 206 lm/W thanks to the perfect interplay of optics and LEDs.

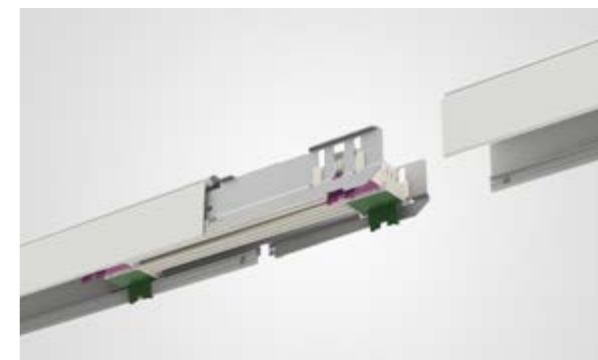

Versatile gear trays offer optimum glare control with a UGR value of  $\leq 19$ . The complete package is suitable for various applications and sets new standards in efficiency.

### Upgrade kit

Upgrade VL2MF modules such as emergency lighting, cleaning lights and escape signs with the Upgrade KIT from RIDI. Can be controlled individually without having to replace the entire trunking system.

### Fully integrated project solutions for central emergency lighting supplies

In addition to the integration of INOTEC, CEAG / EATON and Gessler monitoring modules, We also offer complete emergency luminaires and escape sign luminaires as module inserts for the RIDI LINIA EVO continuous-row lighting system.

FACTS

- Restoration-optimised housing dimensions
- Comfortable, glare-free light for offices, administration and schools
- High efficiency xFlex variants for multi-adjustable luminaire luminous flux
- DALI variants for particularly efficient solutions in combination with APCON light control

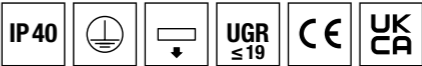

AB surface-mounted ceiling luminaires for rapid refurbishment in 1:1 replacement

The surface-mounted ceiling luminaires in the AB series offer optimum reduced glare for offices, administration and schools. The housing is optimised for refurbishment and designed to cover the mounting marks of the old luminaire on the ceiling. The repairable design of the luminaire enables long-term use of the system.

## FACTS

- Ball-proof surface-mounted and recessed luminaires for sports and multi-purpose halls
- 4 available housing widths
- Ball-proof design enhanced with reinforced louvre
- Highly efficient with RIDI LED technology, sustainable and repairable

**ABR-BWS / EBR-BWS provide functional lighting solutions for applications in multi-purpose and sports halls**

ABR-BWS / EBR-BWS, the classic surface-mounted and recessed louvre luminaires from RIDI fulfil all requirements for the basis of a modern lighting solution in a sports and multi-purpose hall. The luminaires are designed to be repairable for consistency, so that the system can remain in operation for a long time. The high quality standards also offer robustness, which allows long-term use under the heavy loads seen in sports use.

- Efficient and sustainable

## F-LINE WITH MULTILENS TECHNOLOGY

**F-LINE is a classic luminaire family for offices and educational centres**

The F-LINE luminaire range offers solutions for contemporary lighting of office workstations and educational facilities. F-LINE is a timeless all-rounder. A wide selection of optical controls is available. The classic SM specular louvre variant in combination with sustainable RIDI-TUBE technology is timeless and particularly flexible, as the lamp can be replaced tool-less at the end of its service life or when it is converted. The MPO versions with microprismatic cover offer pleasantly diffuse light with glare-free quality.

**MULTILENS technology brings a hybrid optical control of lens and reflector technology to the F-LINE and offers maximum efficiency and a modern appearance.**

The F-LINE with LFA optics is also ideally equipped for panel lighting.

## EL WITH MULTILENS TECHNOLOGY

“ EL luminaire family combines recurring geometries with a wide variety of optical controls in a complete family of recessed and surface-mounted luminaires.

The EL luminaire range offers sustainable and efficient lighting solutions for both recessed and surface-mounted situations. The recessed luminaires are available both as recessed luminaires and as universal recessed luminaires in cut ceilings, system ceilings and panel systems.

The surface-mounted luminaires are optimised for ease of refurbishment in the 1:1 replacement of old luminaires. A wide range of optical controls are available in the same housing geometries, making planning much easier.

“

FACTS

- Sustainable and repairable luminaire design
- EL-E as a recessed luminaire for system ceilings  
Module 600 and 625 panelled ceilings, sawn ceilings
- EL-A as a refurbishment-optimised surface-mounted luminaires in 1:1 replacement
- Easy mounting
- Repairability and high modularity thanks to driver@optic technology

RIDI LINIA EVO®

Tradition and innovation in one continuous-row system

The new continuous-row system impresses with its efficiency, durability, lighting quality and convenience. Thanks to its sophisticated modular design principle it can be adapted to any application. With the up to 14-pole busbar version the continuous line is ideally equipped for all requirements.

The system also enables intelligent networking and offers comprehensive monitoring functions. This makes RIDI LINIA EVO the ideal choice for versatile and demanding continuous-row lighting projects.

RIDI LINIA EVO is available in Multilens technology in many other housings, light colours and dimensions; this brochure only presents a selection of products.

RIDI LINIA EVO

xFlex = adjustable luminous flux

FACTS

- Square recessed luminaire
- Up to 6,500 lumens with UGR<19
- DALI, classic on/off or multi-adjustable luminous flux
- Optimum light distribution for offices and schools

## SE WITH MULTILENS TECHNOLOGY

” **SE recessed luminaires for M600/M625 system ceilings with MULTILENS technology**

SE recessed luminaires with the MULTILENS lighting tool, a highly efficient, hybrid lens/reflector combination, are the perfect choice for the future. For refurbishments as a replacement for reflector louvre luminaires, for new builds simple planning thanks to the sophisticated Lightengine platform. The SE series for M600/M625 system ceilings in the standard version with light colour 840 is available particularly quickly.

The premium version has a extremely elegant appearance thanks to its semi-gloss reflectors. Both variants offer a highly efficient, optical lighting system especially for applications with high requirements for reducing glare, such as offices and schools.

Thanks to its very flat design, the SE series offers a welcome alternative to LED panels.

## MULTILENS STANDARD REFLECTOR RECTANGULAR

Square recessed light, module 625

Item number	Designation	Type of control	Luminous flux [lm]	Power [W]	Efficiency [lm/W]	Light colour	Colour	Length [mm]	Width [mm]	Height [mm]
0828116	SE-EQ0625RFWS840M9S0550	xFlex	5600	38	147	840	white	622	622	50

SE is available in Multilens technology in many other housings, light colours and dimensions; this brochure only presents a selection of products.

xFlex = adjustable luminous flux

## FACTS

- Square for modular ceilings 600 or 625
- Rectangular designs up to 1.5 m in length
- Microprismatic optical control for glare-free lighting
- Models with selectable light colour using ColourSwitch
- Luminous flux variably adjustable with xFlex, also for lower lighting levels
- Particularly high diffuser quality
- IP44 protection rating on the room side

### **FPL4, the high quality standard in and on the ceiling**

The flat design of the FPL4 LED recessed luminaires not only impresses with its low height, but also with its functionality. The luminous flux can be individually adjusted using xFlex. xFlex also enables uniform room lighting at lower illuminance levels, thereby saving additional energy.

Some models also allow a choice between two light colours thanks to the ColourSwitch. The prismatic panel guarantees homogenous illumination and is optimised for guaranteed glare-free lighting. The luminaire is particularly robust and can also be used in rooms that require a higher protection rating on the room side.

## RIDI LINIA®

”

With the RIDI LINIA refurbishment gear trays a quick and efficient replacement of old conventional RIDI LINIA gear trays with T5 and T8 fluorescent lamps without extensive rewiring or conversion work. By utilising the existing trunking infrastructure the installation effort is significantly reduced. This not only leads to considerable time savings, but also enables cost-effective, cost-efficient and a smooth refurbishment of the lighting system with minimal downtime.

**LINIA offers solutions and variants for all indoor lighting requirements up to protection rating IP54.**

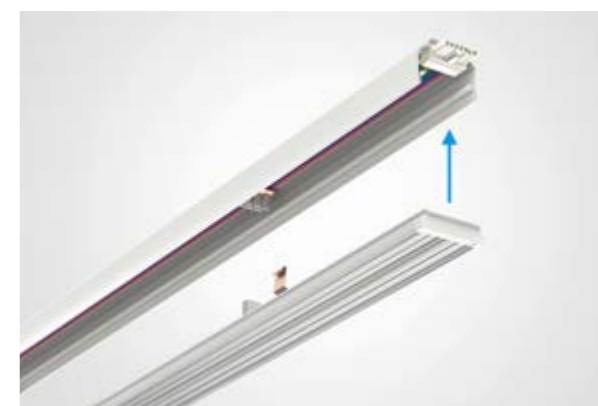

“

### FACTS

- Refurbishment gear tray with flat and low profile design
- Flush-mounted integrated linear optics up to IP54 protection class
- Two different light distributions
- Two different lengths for quick and easy refurbishment (T5 / T8 lengths)

### Refurbishment in record time – uncomplicated 1:1 replacement

- Use of the existing trunking infrastructure possible (taking into account the year of production)
- Fast and efficient solution, without costly rewiring and conversion work

### Two mounting rail variants

#### Mounting rail cable-bound

Year of manufacture 2003 – 2009 (not metric)

Tapping wired

#### Flexible mounting rail

Year of manufacture 2009 – 2019 (not metric)

Flexible connector

# OCARA

**The unique lighting solution for your home office**

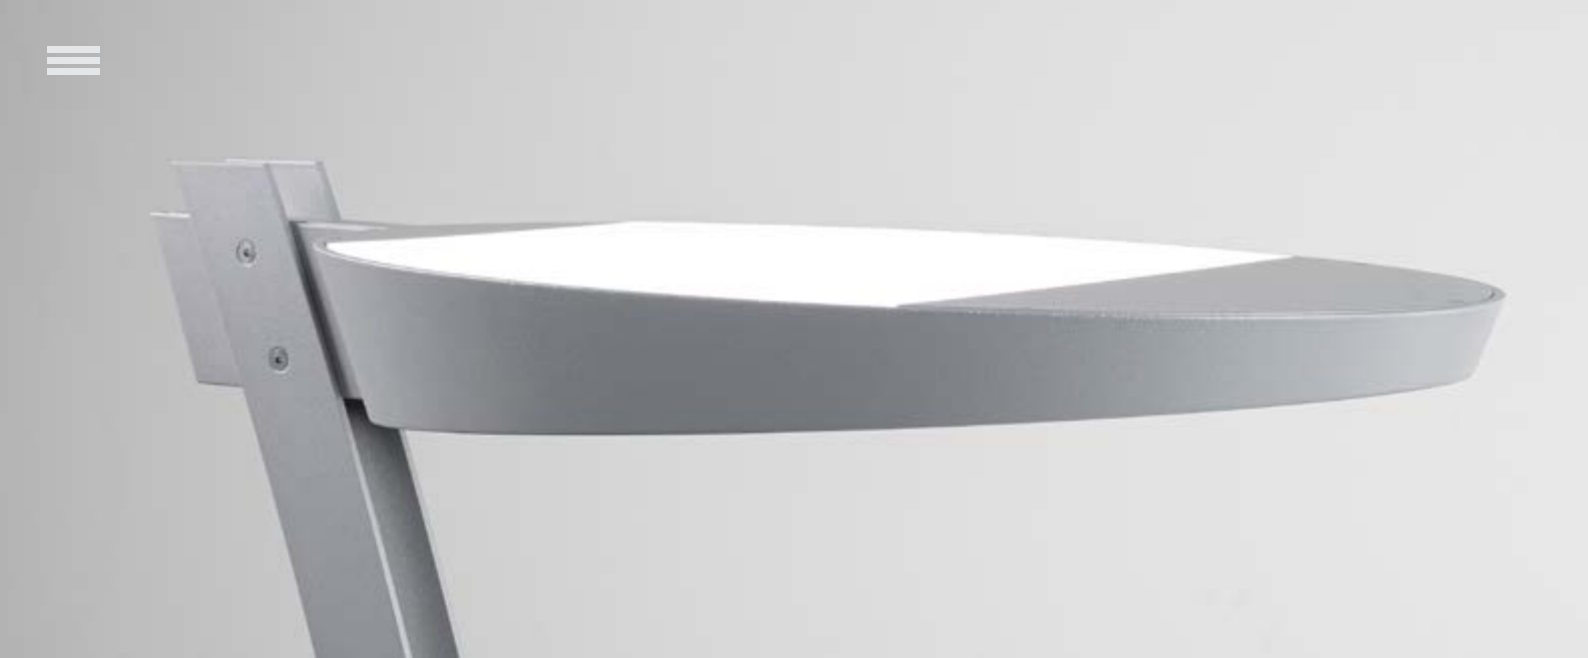

Feel-good light for productive work – thanks to the special intelligently controlled mixture of several lighting components.

1020 mm

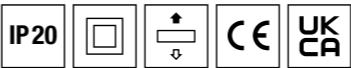

This automatically creates a pleasant room atmosphere that is adapted to the lighting conditions. Ocara is more than just a desk luminaire: ergonomic task light, atmospheric ambient light, intimate reading light, biologically effective melanopic light – „all in one“. The right mix of light from morning to night!

# OCARA...MP...-SEN

Item number	Designation	Type of control	Luminous flux [lm]	Power [W]	Efficiency [lm/W]	Light colour	Colour	Length [mm]	Width [mm]	Height [mm]

# PFSB2

Moisture-proof luminaire with integrated through-wiring

Moisture-proof luminaire PFSB2 is characterised by a high IP65 protection rating and an IK08 impact resistance rating.

The PFSB2 Moisture-proof luminaire is not only versatile, but also impresses with features such as a high operating temperature range (-25-40 °C), IP65 protection rating and a housing made of UV-stabilised polycarbonate. The opal cover ensures homogeneous light distribution, while the daylight white creates a natural, high-contrast light.

Modern RIDI LED technology reduces energy consumption and therefore also operating costs. The PFSB2 luminaire is ideal for refurbishing existing installations. In addition, the most important components can be replaced individually.

## FACTS

- Quick and easy mounting
- xFlex power switch
- Virtually maintenance-free
- Efficient and durable; High impact resistance IK08
- Sustainable thanks to replaceable components

## PFSB2...

# PURELIGHT OFFICE

Classic elegance combined with state-of-the-art technology – illuminate your room with diffuse light for glare-free visual comfort.

The PURELIGHT Office pendant luminaires live up to their name and are reduced to the essentials: Pure light.

Homogeneously distributed via an opal envelope made of UV-stabilised PMMA with white end caps, the direct and indirect light distribution ensures optimum uniformity of illuminance in the room.

The result is glare-free light that is ideal for computer workstations and is also an excellent choice for foyers and reception areas.

**PURELIGHT Office – radiant timelessness.**

**The PURELIGHT Office is a direct-indirect beam opal pendant luminaire with high visual comfort.**

## PURELIGHT-RPDI...O...

Round pendant luminaire with an opal PMMA outer tube and white end caps. Direct and indirect beam.

### FACTS

- Glare-free lighting for computer workstations
- Direct-indirect beam pendant luminaires
- First-class light quality for optimum visual performance
- All-round distribution for the best spatial effect

Further information on  
PURELIGHT Office

# RUF02

The luminaire family RUF02 blends discreetly into any architecture. As wall or ceiling luminaires, arranged individually or in groups, they bathe the room in a subtle, soft light.

**Modern diffuser luminaire RUF02 with opal plastic diffuser in semicircular or cylindrical flat shape for many applications.**

The opal, semi-gloss diffusers made of high-quality PMMA are resistant to many chemical substances and UV-stabilised. The RUF02 is equipped with RIDI's own LED modules, making it particularly high quality and efficient. Available in many designs, e.g. with radar sensor, 2-channel version or emergency light function.

## FACTS

- Opal semi-circular or cylindrical flat diffuser
- Diffuser made of high-quality PMMA also in an impact-resistant design
- Many sizes and variants
- Variants with HF sensor, 2-channel function or emergency light function

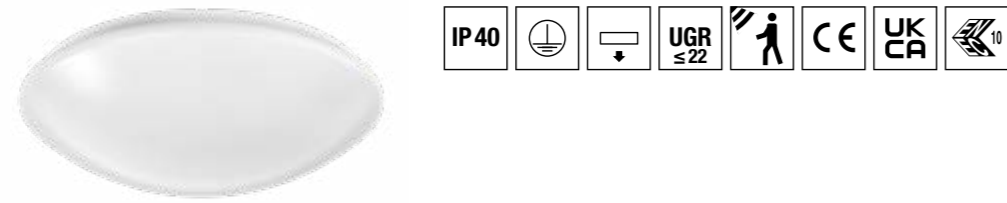

## DIFFUSER LUMINAIRE

SALI – A lighting solution for a wide range of applications. The reliable and powerful single batten luminaire is an outstanding option for industrial facilities, warehouses and grocery shops as well as a 1:1 replacement for conventional 1x58 or 2x58 watt batten luminaires. SALI was developed from the well-known RIDI LINIA family.

**SALI – A lighting solution for demanding applications. The reliable and powerful single batten luminaire for pendant and surface-mounted versions.**

**FACTS**

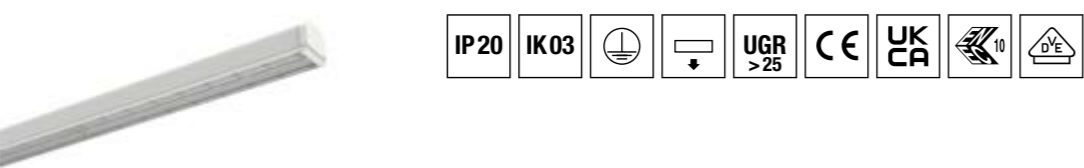

- Refurbishment of existing conventional single batten luminaires
- No conversion work or rewiring necessary
- Easy and quick installation thanks to the pre-assembled connection block
- Increased service life thanks to the latest LED technology

Further information on  
SALI

## SALI-GL...BE...

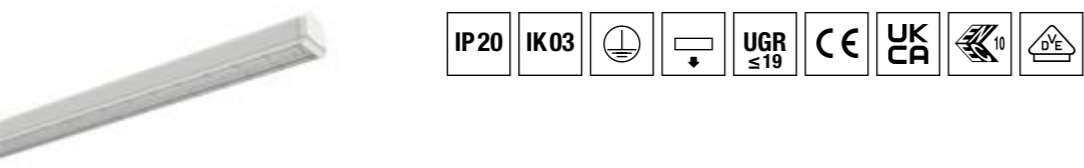

Single batten luminaire for surface and pendant mounting, protection rating IP20, extremely wide beam lens

Item number	Designation	Type of control	Luminous flux [lm]	Power [W]	Efficiency [lm/W]	Light colour	Colour	Length [mm]	Width [mm]	Height [mm]
1552026	SALI-GL150-FLWS840BE1500	xFlex	15140	84	180	840	white	1504	67	62
1562026	SALI-GL150-DAWS840BE1500	DALI-2	14840	84	177	840	white	1504	67	62

## SALI-GL...BU...

Single batten luminaire for surface and pendant mounting, protection rating IP20, wide beam lens optics, UGR ≤19

Item number	Designation	Type of control	Luminous flux [lm]	Power [W]	Efficiency [lm/W]	Light colour	Colour	Length [mm]	Width [mm]	Height [mm]
1552030	SALI-GL150-FLWS840BU0650	xFlex	6450	36	179	840	white	1504	67	62
1562030	SALI-GL150-DAWS840BU0650	DALI-2	6450	36	179	840	white	1504	67	62

## SALI-GL...B...

Single batten luminaire for surface and pendant mounting, protection rating IP20, wide beam lens

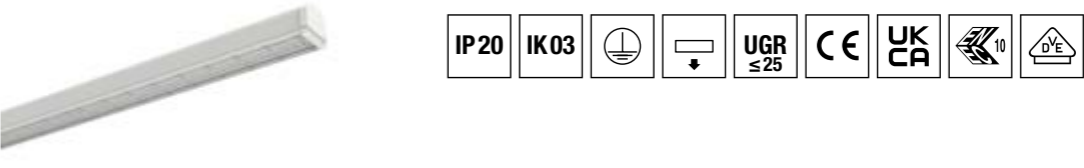

Item number	Designation	Type of control	Luminous flux [lm]	Power [W]	Efficiency [lm/W]	Light colour	Colour	Length [mm]	Width [mm]	Height [mm]
1552024	SALI-GL150-FLWS840B1500	xFlex	15140	84	180	840	white	1504	67	62
1562024	SALI-GL150-DAWS840B1500	DALI-2	15140	84	180	840	white	1504	67	62

xFlex = adjustable luminous flux | DALI-2 = dimmable

## SALI-GL...TB...

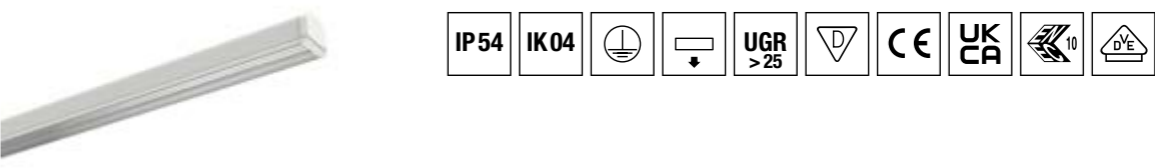

Single batten luminaire for surface and pendant mounting, protection rating IP20, deep wide beam lens

Item number	Designation	Type of control	Luminous flux [lm]	Power [W]	Efficiency [lm/W]	Light colour	Colour	Length [mm]	Width [mm]	Height [mm]
1552025	SALI-GL150-FLWS840TB1500	xFlex	15140	84	180	840	white	1504	67	61
1562025	SALI-GL150-DAWS840TB1500	DALI-2	15330	85	180	840	white	1504	67	61

## SALI-GPS...B...

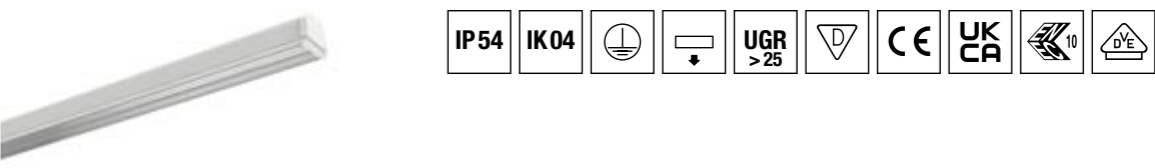

Single batten luminaire for surface and pendant mounting, protection rating IP54, wide beam prismatic optics

Item number	Designation	Type of control	Luminous flux [lm]	Power [W]	Efficiency [lm/W]	Light colour	Colour	Length [mm]	Width [mm]	Height [mm]
1552022	SALI-GPS150-FLWS840B1000	xFlex	9820	62	158	840	white	1504	67	62
1562022	SALI-GPS150-DAWS840B1000	DALI-2	9820	62	158	840	white	1504	67	62

## SALI-GPS...E...

Single batten luminaire for surface and pendant mounting, protection rating IP54, narrow-beam prismatic optics

Item number	Designation	Type of control	Luminous flux [lm]	Power [W]	Efficiency [lm/W]	Light colour	Colour	Length [mm]	Width [mm]	Height [mm]
1552023	SALI-GPS150-FLWS840E1000	xFlex	9930	62	160	840	white	1504	67	62
1562023	SALI-GPS150-DAWS840E1000	DALI-2	9930	62	160	840	white	1504	67	62

xFlex = adjustable luminous flux | DALI-2 = dimmable
